National Policy, Global Giants Oct 20 2021 What can we tell about the future of automobiles and the industries that make them by examining their past? Wormald and Rennick trace the history of powered land transport, the rise and fall of the railways, the spectacular rise of the automobile, and what might come next. Delving into the mighty and complex automotive industry, following the growth of the markets and production, this book illustrates the globalization of vehicle manufacturers and component suppliers, giving form to the development of the industry's business model. A key factor in an auto-industry's successes and failures is the often-difficult relationship it has with government, which varies in nature from country to country. As an illustrative case, Wormald and Rennick present and analyse the entire lifecycle of Australia's automotive history - including its birth, growth, functioning and death - and its shifting relationship with the government that supported it.

Two end-June 2015 quantitative PCs and three indicative targets were missed, but deviations were either minor or temporary and corrective actions have been taken as needed. The authorities remain on track to meet the end-September 2015 program targets. Although the program's monetary PCs were met, the PCs on the fiscal deficit and government borrowing from the central bank were missed. 88 Instruments Mar 01 2020 "The rhythmic, onomatopoeic text dances across exuberant watercolors with lots of movement. This celebration of a child's agency in choosing a means of artistic expression strikes just the right note." --Kirkus "A delightful offering for reading aloud, especially during music-themed storytimes." -- School Library Journal From New York Times bestselling author Chris Barton and new illustrator Louis Thomas comes a fun, rhythmic picture book about finding the music that is perfect for you! A boy who loves to make noise gets to pick only one instrument (at his parents urging) in a music store, but there is too much to choose from! There's triangles and sousaphones! After #MeToo Aug 30 2022 In After #MeToo, Gerard Casey provides a critical assessment of the #MeToo movement, situating it in the

context of the radical feminism of which it is just the latest manifestation. Apart from its legitimating an indiscriminate attack on men and masculinity, Casey argues that the #MeToo movement has exposed a conceptual fault-line in radical feminist anthropology. Are women fully-developed moral agents, able to exercise moral choice and to take responsibility for what they do; or are women elements of a collective made up of the victims of sexual crimes, whose suffering is not just that of any one individual woman but of the group as a whole? Casey's analysis of the #MeToo movement is prefaced by a brief typology of forms of feminism and by an account of the supposedly universal oppression of women by a malign patriarchy. He argues that if there is such a thing as the patriarchy, it is singularly and spectacularly ineffectual in its operation inasmuch as women, on the whole, are not only not oppressed in comparison to men but are rather the beneficiaries of legal and social privileges. After #MeToo concludes with a consideration of the changing legal definitions of rape. Once understood to be essentially a crime of violence, rape has now come to be regarded as a violation of personal autonomy. In common law systems, a certain conception of consent is now central to the definition of rape, a conception that, Casey argues, is unworkable, at once infantilising women and, at the same time, potentially criminalising every sexual encounter in which a man is involved.
