Focus on Posttraumatic Stress Disorder Research Nov 12 2020 Posttraumatic Stress Disorder, or PTSD, is a psychiatric disorder that can occur following the experience or witnessing of life-threatening events such as military combat, natural disasters, terrorist incidents, serious accidents, or violent personal assaults like rape. People who suffer from PTSD often relive the experience through nightmares and flashbacks, have difficulty sleeping, and feel detached or estranged, and these symptoms can be severe enough and last long enough to significantly impair the person's daily life. PTSD is marked by clear biological changes as well as psychological symptoms. PTSD is complicated by the fact that it frequently occurs in conjunction with related disorders such as depression, substance abuse, problems of memory and cognition, and other problems of physical and mental health. The disorder is also associated with impairment of the person's ability to function in social or family life, including occupational instability, marital problems and divorces. PTSD is associated with a number of distinctive neurobiological and physiological changes. PTSD is treated by a variety of forms of psychotherapy and drug therapy. This new book presents leading research from around the world.

The Heavenly Writing Jul 29 2019 In antiquity, the expertise of the Babylonians in matters of the heavens was legendary and the roots of both western astronomy and astrology are traceable in cuneiform tablets going back to the second and first millennia BC. The Heavenly Writing, first published in 2004, discusses the place of Babylonian celestial divination, horoscopy, and astronomy in Mesopotamian intellectual culture. Focusing chiefly on celestial divination and horoscopes, it traces the emergence of personal astrology from the tradition of celestial divination and the use of astronomical methods in horoscopes. It further takes up the historiographical and philosophical issue of the nature of these Mesopotamian 'celestial sciences' by examining elements traditionally of concern to the philosophy of science, without sacrificing the ancient methods, goals, and interests to a modern image of science. This book will be of particular interest to those concerned with the early history of science.

Behavioral Science in the Global Arena Apr 05 2020 Behavioral scientists are increasingly involved in international work through cross cultural research, conference presentations, and faculty exchanges. Psychology and social work NGOs work at the United Nations, both on providing professional consultation on timely issues, as well as advocating to promote human rights and sustainable development. Although this work at the United Nations is an important arena for behavioral scientists, this has been barely covered in the academic literature. "What are growing roles of psychology and the behavioral sciences at the United Nations today?" This first-ever volume brings together over 20 authors--both key experts and student interns--to answer this question. As the United Nations pursues its 17 Sustainable Development Goals (SDGs) for the year 2030, behavioral scientists now occupy increasingly diverse roles to pursue evidence-based answers for these 17 timely SDGs. This panoramic yet concise 230-page volume is designed for students and professionals in the behavioral sciences, psychology and social work to provide state-of-the-art information on how behavioral scientists are addressing diverse global issues today. Each chapter offers a concise overview of a topic, including a glossary of current concepts, and citations to current research. ENDORSEMENTS "I am delighted to recommend this volume, which

uncovers two important truths to the success of the UN. 1. The critical role of civil society that makes the UN more humane. 2. The important role of behavioral sciences in shaping UN policies to produce successful outcomes. Because of the UN, we've not had a third world war, yet. Human Rights have expanded beyond belief of anyone who founded the UN 75 years ago." - Bruce Knotts, U.S. diplomat, author, and Chair of the U.N. DPI NGO Executive Committee "As this new volume describes, the world is a better place because of the United Nations - where most of the world comes together with diverse and lofty goals such as protecting the environment, promoting health, supporting equality, and maintaining peace. All of these major goals require interventions that sometimes maintain and sometimes change human behavior. National and international policies need to be informed by the best available research in the behavioral sciences. Our future depends on it." - Diane F. Halpern, PhD., Former President, American Psychological Association "Attaining the United Nations' 17 Sustainable Development Goals (SDGs) by 2030 is a formidable challenge that can be furthered by a foundation of solid evidence. This book provides a base of relevant psychological knowledge that can inform policy and interventions in the achievement of those goals." - Judith A. Gibbons, PhD, Past-President, Interamerican Society of Psychology "The authors make a convincing case for the relevance of behavioral sciences to the work of the United Nations. Progress on women's rights, preparing for and recovering from natural disasters, adapting to climate change, improving child well-being

and more all have behavioral dimensions. These must be addressed for the UN to make progress on its goals. By chronicling the involvements of psychology and social work in the United Nations, this volume will inspire students and practitioners to engage further in global work and advocacy." - Lynne Healy, PhD, International Association of Schools of Social Work "Behavioral Science in the Global Arena - a timely and significant volume about the role of psychologists at the UN addressing our contemporary social problems - i.e. human rights, social justice, climate and environmental change. As Congress, Takooshian, and Asper demonstrate, it is time for psychologists to move from their individual focus toward social change at a macro, diverse and global focus following the UN's 17 sustainable development goals for 2030. We need to acknowledge changing population demographics, growing mobility and aging in our population, and recognize the continued gender inequities and disparities among migrants salient today. No longer can we simply consider psychology's role in the aftermath of disaster, but to be proactive and on the forefront about counterterrorism, climate change, etc. to promote global action so that we think and act together toward shared social change." - Jean Lau Chin, EdD, ABPP, Past-President, International Division, American Psychological Association "As the UN celebrates its diamond anniversary, it is fitting that thinkers in psychology provide critical insights into psychology's engagement with the UN SDG Agenda. The authors have carefully considered the UN from many vantage points, especially behavioural. This important volume posits

fresh ideas for psychology's role and future impact in the only global body that brings all governments together to tackle the social, economic, political and security factors that are essential for peace and collective human development in our fragile world." - Saths Cooper, PhD, Past-President, International Union of Psychological Scientists (IUPsyS) "I am very excited to see the publication of a much-needed book on the contribution of the behavioral sciences at the UN which highlights the role of social work. The editors have successfully illuminated how social workers have been increasingly involved in addressing international issues. Speaking as the current president of NASW, member of the International Federation of Social Workers Executive and as a social work educator, I am especially appreciative of the content on the long-term involvement that social workers have had in the work of the UN. This book is a gift to students who are increasingly seeking to become involved in international social work. I am especially impressed by the editors' commitment to promoting the professional development of students by having them co-author the chapters in the book with both academics and UN leaders. Well done!" - Kathryn Conley
