*Clear and Queer Thinking* Apr 05 2020 Laurence Goldstein gives a straightforward and lively account of some of the central themes of Wittgenstein's writings on meaning, mind, and mathematics. He does this both by drawing on Wittgenstein's work to show how his thinking developed over time and by helping the reader gain some impression of what a strange character Wittgenstein was--for how he was is intimately related to how and what he wrote.

**India's Doctrine Puzzle** Mar 17 2021 The balance of power in South Asia is tenuous. Neighbouring states with nuclear arsenal pose a serious threat in times of conflict and the danger of escalation into a nuclear holocaust in South are ever-present. This book locates the change in India's war doctrine at the turn of the century, following the Kargil War

in 1999 between India and Pakistan. It examines how war policy was shaped by the threat posed by India's neighbours and the need for greater strategic assertion. It also reveals that this change was forced by the military's need to adapt itself to the nuclear age. Finally, it raises questions of whether the Limited War doctrine has made India more secure. An astute analysis of not only India's military strategy but also of military doctrine in general, this book will be valuable to scholars and researchers of defence and strategic studies, international relations, peace and conflict studies, South Asia studies as well as government and military institutions.

**The Eugenic Mind Project** Jun 19 2021 An examination of eugenic thinking past and present, from forced sterilization to prenatal screening, drawing on experience with those who survived eugenics. Part

science and part social movement, eugenics emerged in the late nineteenth century as a tool for human improvement. In response to perceived threats of criminality, moral degeneration, feeble-mindedness, and "the rising tide of color," eugenic laws and social policies aimed to better the human race by regulating reproductive choice through science and technology. In this book, Rob Wilson examines eugenic thought and practice--from forced sterilization to prenatal screening--drawing on his experience working with eugenics survivors. Using the social sciences' standpoint theory as a framework to understand the intersection of eugenics, disability, social inclusiveness, and human variation, Wilson focuses on those who have lived through a eugenic past and those confronted by the legacy of eugenic thinking today. By doing so, he brings eugenics from the distant past to the ongoing present. Wilson discusses such topics as the conceptualization of eugenic traits; the formulation of laws regulating immigration and marriage and requiring sexual sterilization; the depiction of the targets of eugenics as "subhuman"; the systematic construction of a concept of normality; the eugenic logic in prenatal screening and contemporary bioethics; and the incorporation of eugenics and disability into standpoint theory.

Spaces of Identity Feb 13 2021 We are living through a time when old identities - nation, culture and gender are melting down. Spaces of Identity examines the ways in which collective cultural identities are being reshaped under conditions of a post-modern geography and a communications environment of cable and satellite broadcasting. To address current problems of identity, the authors look at contemporary politics between Europe and its most significant others: America; Islam and the Orient. They show that it's against these places that Europe's own identity has been and is now being defined. A stimulating account of the complex and contradictory nature of contemporary cultural identities.

*Strategic Culture, Securitisation and the Use of Force* Oct 24 2021 This book investigates, and explains, the extent to which different liberal democracies have resorted to the use of force since the 9/11 terrorist attacks. The responses of democratic states throughout the world to the

September 2001 terrorist attacks have varied greatly. This book analyses the various factors that had an impact on decisions on the use of force by governments of liberal democratic states. It seeks to explain differences in the security policies and practices of Australia, Canada, France, Germany and the UK regarding the war in Afghanistan, domestic counterterrorism measures and the Iraq War. To this end, the book combines the concepts of strategic culture and securitisation into a theoretical model that disentangles the individual structural and agential causes of the use of force by the state and sequentially analyses the impact of each causal component on the other. It argues that the norms of a strategic culture shape securitisation processes of different expressions, which then bring about distinct modes of the use of force in individual security policy decisions. While governments can also deviate from the constraints of a strategic culture, this is likely to encounter a strong reaction from large parts of the population which in turn can lead to a long-term change in strategic culture. This book will be of much interest to students of strategic culture, securitisation, European politics, security studies and IR in general.

*Tis* Sep 30 2019 Frank McCourt's glorious childhood memoir, *Angela's Ashes*, has been loved and celebrated by readers everywhere for its spirit, its wit and its profound humanity. A tale of redemption, in which storytelling itself is the source of salvation, it won the National Book Critics Circle Award, the Los Angeles Times Book Award and the Pulitzer Prize. Rarely has a book so swiftly found its place on the literary landscape. And now we have *'Tis*, the story of Frank's American journey from impoverished immigrant to brilliant teacher and raconteur. Frank lands in New York at age nineteen, in the company of a priest he meets on the boat. He gets a job at the Biltmore Hotel, where he immediately encounters the vivid hierarchies of this "classless country," and then is

drafted into the army and is sent to Germany to train dogs and type reports. It is Frank's incomparable voice -- his uncanny humor and his astonishing ear for dialogue -- that renders these experiences spellbinding. When Frank returns to America in 1953, he works on the docks, always resisting what everyone tells him, that men and women who have dreamed and toiled for years to get to America should "stick to their own kind" once they arrive. Somehow, Frank knows that he should be getting an education, and though he left school at fourteen, he talks his way into New York University. There, he falls in love with the quintessential Yankee, long-legged and blonde, and tries to live his dream. But it is not until he starts to teach -- and to write -- that Frank finds his place in the world. The same vulnerable but invincible spirit that captured the hearts of readers in *Angela's Ashes* comes of age. As Malcolm Jones said in his Newsweek review of *Angela's Ashes*, "It is only the best storyteller who can so beguile his readers that he leaves them wanting more when he is done...and McCourt proves himself one of the very best." Frank McCourt's *'Tis* is one of the most eagerly awaited books of our time, and it is a masterpiece.

**Dazzled and Deceived** Sep 10 2020 *Dazzled and Deceived* tells the unique and fascinating story of mimicry and camouflage in science, art, warfare, and the natural world. Discovered in the 1850s by the young English naturalists Henry Walter Bates and Alfred Russel Wallace in the Amazonian rainforest, the phenomenon of mimicry was seized upon as the first independent validation of Darwin's theory of natural selection. But mimicry and camouflage also created a huge impact outside the laboratory walls. Peter Forbes's cultural history links mimicry and camouflage to art, literature, military tactics, and medical cures across the twentieth century, and charts its intricate involvement with the perennial dispute between evolution and creationism.

[The Ethical Nexus](#) May 31 2022 During the 1980s, organizational

theorists and managers alike rediscovered the role that values play in organizational life and became concerned about the apparent lack of values that underlie unethical organizational behavior. This volume examines the complex interrelationships among values, ethics, and organizational decision making. It focuses on communication, because it is through discourse that people develop their own moral codes, organizations develop and inculcate core values and ethical precepts, and incongruities within and between value sets are negotiated. Each essay also deals with modes of making decisions.

**Nexus of Global Jihad** Jan 03 2020 Leading jihadist groups such as al-Qaeda and the Islamic State dominate through cooperation in the form of knowledge sharing, resource sharing, joint training exercises, and operational collaboration. They build alliances and lesser partnerships with other formal and informal terrorist actors to recruit foreign fighters and spread their message worldwide, raising the aggregate threat level for their declared enemies. Whether they consist of friends or foes, whether they are connected locally or online, these networks create a wellspring of support for jihadist organizations that may fluctuate in strength or change in character but never runs dry. Nexus of Global Jihad identifies types of terrorist actors, the nature of their partnerships, and the environments in which they prosper to explain global jihadist terrorism's ongoing success and resilience. Nexus of Global Jihad brings to light an emerging style of "networked cooperation" that works alongside interorganizational terrorist cooperation to establish bonds of varying depth and endurance. Case studies use recently declassified materials to illuminate al-Qaeda's dealings from Iran to the Arabian Peninsula and the informal actors that power the Sharia4 movement. The book proposes policies that increase intelligence gathering on informal

terrorist actors, constrain enabling environments, and disrupt terrorist networks according to different types of cooperation. It is a vital text for strategists and scholars struggling to understand a growing spectrum of terrorist groups working together more effectively than ever before.

**Artificial Intelligence/ Human Intelligence: An Indissoluble Nexus** Apr 29 2022 This book presents a novel view of intelligence, and of the relationship between machine intelligence and human beings. From this perspective, machine intelligence is viewed as an artificial aid to human intelligence, and the two are seen to form a 'seamless web'. Having established this new perspective on intelligence, the book highlights some basic deficiencies of unaided human intelligence through case studies to show how human beings are capable of destroying existing intelligence networks as well as how they fail to recognize that such intelligence networks are needed. In many such cases, along with the

other aspects of the problem, there is also a failure of discourse: bad arguments and the like dominate the discourse, and crucial aspects of the situation are overlooked or glossed over. The book then lays out a proposal on how to deal with this kind of problem — one that relies heavily on techniques developed in AI. This is done in the form of a new kind of grand challenge for AI, involving software monitors that are applied to discourse on major issues. All this is in keeping with the perspective on intelligence and AI presented in this book.

**An Anthropology of Puzzles** Jul 01 2022 An Anthropology of Puzzles argues that the human brain is a "puzzling organ" which allows humans to literally solve their own problems of existence through puzzle format. Noting the presence of puzzles everywhere in everyday life, Marcel Danesi looks at puzzles in society since the dawn of history, showing how their presence has guided large sections of human history, from discoveries in mathematics to disquisitions in philosophy. Danesi examines the cognitive processes that are involved in puzzle making and solving, and connects them to the actual physical manifestations of classic puzzles. Building on a concept of puzzles as based on Jungian archetypes, such as the river crossing image, the path metaphor, and the journey, Danesi suggests this could be one way to understand the public

fascination with puzzles. As well as drawing on underlying mental archetypes, the act of solving puzzles also provides an outlet to move beyond biological evolution, and Danesi shows that puzzles could be the product of the same basic neural mechanism that produces language and culture. Finally, Danesi explores how understanding puzzles can be a

new way of understanding our human culture.
