Citizen Science Nov 05 2022 Citizen science, the active participation of the public in scientific research projects, is a rapidly expanding field in open science and open innovation. It provides an integrated model of public knowledge production and engagement with science. As a growing worldwide phenomenon, it is invigorated by evolving new technologies that connect people easily and effectively with the scientific community. Catalysed by citizens' wishes to be actively involved in scientific processes, as a result of recent societal trends, it also offers contributions to the rise in tertiary education. In addition, citizen science provides a valuable tool for citizens to play a more active role in sustainable development. This book identifies and explains the role of citizen science within innovation in science and society, and as a vibrant and productive science-policy interface. The scope of this volume is global, geared towards identifying solutions and lessons to be applied across science, practice and policy. The chapters consider the role of citizen science in the context of the wider agenda of open science and open innovation, and discuss progress towards responsible research and innovation, two of the most critical aspects of science today.

Subtle is the Lord: The Science and the Life of Albert Einstein Sep 22 2021 Subtle is the Lord is widely recognized as the definitive scientific biography of Albert Einstein. The late Abraham Pais was a distinguished physicist turned historian who knew Einstein both professionally and personally in the last years of his life. His biography combines a profound understanding of Einstein's work with personal recollections from their years of acquaintance, illuminating the man through the development of his scientific thought. Pais examines the formulation of Einstein's theories of relativity, his work on Brownian motion, and his response to quantum theory with authority and precision. The profound transformation Einstein's ideas effected on the physics of the turn of the century is here laid out for the serious reader. Pais also fills many gaps in what we know of Einstein's life - his interest in philosophy, his concern with Jewish destiny, and his opinions of great figures from Newton to Freud. This remarkable volume, written by a physicist who mingled in Einstein's scientific circle, forms a timeless and classic biography of the towering figure of twentieth-century science.

The Oxford Book of Modern Science Writing Mar 05 2020 Selected and introduced by Richard Dawkins, The Oxford Book of Modern Science Writing is a celebration of the finest writing by scientists for a wider audience - revealing that many of

the best scientists have displayed as much imagination and skill with the pen as they have in the laboratory. This is a rich and vibrant collection that captures the poetry and excitement of communicating scientific understanding and scientific effort from 1900 to the present day. Professor Dawkins has included writing from a diverse range of scientists, some of whom need no introduction, and some of whose works have become modern classics, while others may be less familiar - but all convey the passion of great scientists writing about their science.

Proof Mar 29 2022 Named a Best Science Book of 2014 by Amazon, *Wired*, the *Guardian*, and NBC Winner of the 2014 Gourmand Award for Best Spirits Book in the United States Finalist for the 2015 PEN/E. O. Wilson Literary Science Writing Award "Lively . . . [Rogers's] descriptions of the science behind familiar drinks exert a seductive pull." -- *New York Times* Humans have been perfecting alcohol production for ten thousand years, but scientists are just starting to distill the chemical reactions behind the perfect buzz. In a spirited tour across continents and cultures, Adam Rogers takes us from bourbon country to the world's top gene-sequencing labs, introducing us to the bars, barflies, and evolving science at the heart of boozy technology. He chases the physics, biology, chemistry, and metallurgy that produce alcohol, and the psychology and neurobiology that make us want it. If you've ever wondered how your drink arrived in your glass, or what it will do to you, *Proof* makes an unparalleled drinking companion. "Rogers's book has much the same effect as a good drink. You get a warm sensation, you want to engage with the wider world, and you feel smarter than you probably are. Above all, it makes you understand how deeply human it is to take a drink." -- *Wall Street Journal* Adam Rogers is the articles editor at *Wired*, where his feature story "The Angels' Share" won the 2011 AAAS Kavli Science Journalism Award. Before *Wired*, he was a Knight Science Journalism Fellow at MIT and a writer covering science and technology for *Newsweek*. He lives in Berkeley, California.

The Faber Book of Science Aug 22 2021 *The Faber Book of Science* introduces hunting spiders and black holes, gorillas

and stardust, protons, photons and neutrinos. In his acclaimed anthology, John Carey plots the development of modern science from Leonardo da Vinci to Chaos Theory. The emphasis is on the scientists themselves and their own accounts of their breakthroughs and achievements. The classic science-writers are included - Darwin, T.H. Huxley and Jean Henri Fabre tracking insects through the Provençal countryside. So too are today's experts - Steve Jones on the Human Genome Project, Richard Dawkins on DNA and many other representatives of the contemporary genre of popular science-writing which, John Carey argues, challenges modern poetry and fiction in its imaginative power.
