NASA Graphics Standards Manual Nov 15 2021 The NASA Graphics Standards Manual, by Richard Danne and Bruce Blackburn, is a futuristic vision for an agency at the cutting edge of science and exploration. Housed in a special anti-static package, the book features a foreword by Richard Danne, an essay by Christopher Bonanos, scans of the original manual (from Danne's personal copy), reproductions of the original NASA 35mm slide presentation, and scans of the Managers Guide, a follow-up booklet distributed by NASA.
BSAVA Manual of Canine and Feline Behavioural Medicine Jan 25 2020 The importance of animal behavior and psychological well-being is increasingly being recognized in the veterinary profession. This new edition is designed to be even more practical and user-friendly than the first. For a range of behavioral presentations, consideration is given to evaluation of the patient, including any possible underlying disease; evaluation of client attitudes, beliefs and behavior; risk evaluation; behavioral biology of the condition; acute management protocols; long-term treatment strategies; prognosis; follow-up; and preventive measures. A special chapter on shelter animals has been added, as this is an area where veterinary support is increasingly sought in both health and husbandry. An included CD offers client handouts, history-taking forms, detailed behavioral questionaires for each species and a referral form.
Satellite Image Analysis: Clustering and Classification Dec 04 2020 Thanks to recent advances in sensors, communication and satellite technology, data storage, processing and networking capabilities, satellite image acquisition and mining are now on the rise. In turn, satellite images play a vital role in providing essential geographical information. Highly accurate automatic classification and decision support systems can facilitate the efforts of data analysts, reduce human error, and allow the rapid and rigorous analysis of land use and land cover information. Integrating Machine Learning (ML) technology with the human visual psychometric can help meet geologists' demands for more efficient and higher-quality classification in real time. This book introduces readers to key concepts, methods and models for satellite image analysis; highlights state-of-the-art classification and clustering techniques; discusses recent developments and remaining challenges; and addresses various applications, making it a valuable asset for engineers, data analysts and researchers in the fields of geographic information systems and remote sensing engineering.

NASA Graphics Standards Manual Remastered Edition Oct 14 2021 The NASA Graphics Standards Manual: Remastered Edition is a modern spin on the original NASA Graphics Standards Manual published in 1976 and puts it into a new and clean format. Using high-resolution scans of the original book, over two-hundred man-hours were spent in recreating and remastering the original drawings with very fine details. This book is not in the same format as the original, as the original manual was in a binder. However, much care was taken in ensuring the correct image and font proportions were used. The original double-spread pages were reformatted to fit onto two single facing pages. Photos from the original book were replaced with the original photos sourced from the NASA library, and missing photos were replaced with similar photos obtained from the NASA library. This edition is published with the highest quality print-on-

demand techniques along with the most vivid color, and printed on thick 70 lb. paper. Fine type sized as small as three point Helvetica is still legible, and the reproduced drawings are clean and crisp. If you are a fan of NASA, then this book is a great addition to your NASA library.
