Supporting Grade 5-8 Students in Constructing Explanations in Science Dec 09 2020
Grounded in National Science Foundation (NSF) funded-research, Supporting Grade 5-8 Students in Constructing Explanations in Science and DVD provides middle grades science teachers with an instructional framework that breaks down the practice of scientific explanation into manageable components---claim, evidence, reasoning---and offers concrete examples of what this scientific inquiry practice looks like when it is successfully implemented in real classrooms. The chapters guide teachers step-by-step through presenting the framework for students; creating learning tasks involving scientific explanation; providing curricular scaffolds (that fade over time) to support students developing explanations; developing scientific explanation assessment tasks; and using the information from assessment tasks to inform instruction. By incorporating this framework into curriculum materials, instructional strategies, and assessments, many schools have already witnessed its power to enhance students' conceptual understanding and ability to think and communicate scientifically while also affording teachers powerful opportunities to view student thinking and better adapt instruction to all students' needs. "I would encourage others to use [this book] as a resource for a professional learning community or department discussion group and the like... absolutely I would recommend it---why? It is simply good for our students' developing understanding of science..."---Pamela M. Pelletier, Senior Program Director, Science K-12, Boston Public Schools, Boston, Massachusetts "[This book] can easily be used to guide middle school teams to collaboratively work together to ask higher order thinking questions in any core content area. This type of questioning leads to great classroom discourse, therefore engaging students in using claims, evidence, and reasoning."---Kendra Walters Durham, Science Teacher, Wester Middle School, Frisco, Texas

Skill Sharpeners Science, Grade 5 Oct 19 2021 Builds understanding of science concepts that are taught in the classroom and based on the most current standards. This book helps children learn physical, life and earth science concepts while practicing reading comprehension, vocabulary, writing skills and visual literacy.

Longman Science Jun 22 2019 Longman Science prepares students in grades 6-12 for success in a standards-based science program with a broad overview of life, earth, and physical science. All activities are specifically geared to students in the early stages of English language acquisition, and help build content knowledge, skills, and learning strategies. Special offer: Take advantage of our special offer: get the Longman Science Student Book and Workbook for only \$44.95. That's 25% off the regular price of these two books combined. Click here for details. Features For beginning to high beginning English language learners. "Getting Started" unit introduces concepts of science, safety, and the scientific method. Reading strategies are explicitly taught and modeled throughout the readings. Science skills, such as using and interpreting visuals, charts, and graphs are taught and recycled throughout each lesson. Unit Review provides additional practice, extension projects, further reading, and a Unit Experiment. Vocabulary building activities and glossaries help students access and build mastery of the content.
