Crisis and Reform in Latin America Oct 04 2022 This work provides a thorough analytical review of the processes that led to the transformation of many Latin American economies during the last decade. The author examines every aspect of adjustment and reform since 1980 and suggests alternative ways to consolidate the achievements.

The Sovereign Debt Crisis, the EU and Welfare State Reform Jun 27 2019 This book offers a much-needed analysis of how the European Union (EU) has affected welfare state reforms in the Member States most severely hit by the 2008 economic crisis. Bringing together leading European social policy researchers, it shows that the EU's responses to the sovereign debt crisis have changed the nature of EU intervention into domestic welfare states, with an enhanced focus on fiscal consolidation, increased surveillance and enforcement of EU measures. The authors demonstrate how this represents an unprecedented degree of EU involvement in domestic social and labour market policies. Readers will also discover how greater demands to attain balanced budgets have been institutionalized, leading to tensions with the EU's social investment strategy. This highly informative edited collection will engage students, social policy practitioners and researchers, scholars of the welfare state and political scientists. “/div>div

Legal Aid in Crisis Nov 24 2021 One of the many areas of social support affected by the recent austerity measures in Britain is legal aid, which has suffered under cuts so substantial that, this book argues, the result is the most radical set of changes in the sixty-year history of legal aid in the nation, a transformation of its very meaning and purpose. From an original position as a form of social welfare to which nearly anyone could get access, it is now seen as a benefit, outside the

legal system, and almost wholly cast in economic terms. This book looks at this shift and its far-reaching consequences not just for individuals but for the whole of the court system.

Crisis and Change in the British and Dutch Prison Services Jan 03 2020 Examining the conditions under which a crisis in a policy sector can lead to significant reform within the sector, this study draws on crises within the British and Dutch Prison Services.

Corporate Governance Apr 29 2022 This critical work explores the central dynamic of industrial capitalism – the cycle of brilliant innovation, catastrophic crisis, and the painful process of corporate governance reform. Coverage includes cycles of crisis and regulation, financial bubbles, including the global financial crisis, and digital disruption. Finally, the current crisis of industry induced climate change that now imperils the world is considered. *Corporate Governance: Cycles of Innovation, Crisis and Reform* is essential reading for final year undergraduate and postgraduate students of Corporate Governance, International Business and Business and Management Studies. Thomas Clarke is Emeritus Professor of Management at the University of Technology, Sydney. He is a Fellow of the Royal Society of Arts (FRSA) and an international corporate governance expert.

From Triumph to Crisis Sep 30 2019 Explains the surprising endurance of neoliberal policymaking over two decades in post-Communist countries, from 1989-2008, and its decline after the financial crash.

From Economic Crisis to Reform Jul 21 2021 The wave of neoliberal economic reforms in the developing world since the 1980s has been regarded as the result of both severe economic crises and policy pressures from global financial institutions such as the International Monetary Fund (IMF). Using comparative evidence from the initiation and implementation of IMF programs in Latin America and Eastern Europe, *From Economic Crisis to Reform* shows that economic crises do not necessarily persuade governments to adopt IMF-style economic policies. Instead, ideology, interests, and institutions, at both the international and domestic levels, mediate responses to such crises. Grigore Pop-Eleches explains that the IMF's response to economic crises reflects the changing priorities of large IMF member countries. He argues that the IMF gives greater attention and favorable treatment to economic crises when they occur in economically or politically important countries. The book also shows how during the neoliberal consensus of the 1990s, economic crises triggered IMF-style reforms from governments across the ideological spectrum and how these reforms were broadly compatible with democratic politics. By contrast, during the Latin American debt crisis, the contentious politics of IMF programs reflected the ideological rivalries of

the Cold War. Economic crises triggered ideologically divergent domestic policy responses and democracy was often at odds with economic adjustment. The author demonstrates that an economic crisis triggers neoliberal economic reforms only when the government and the IMF agree about the roots and severity of the crisis.

Crisis and Reform in China Sep 03 2022 Contains essays on China's reforms in the wider context of transition, the role of energy in sustaining growth, military modernization, population dynamics and economic implications, social development and the environment, and village elections. Great Expectations, Slow Transformation Oct 31 2019 In the aftermath of the financial crisis, why has the reform process been incremental yet the conditions for more rapid and abrupt transformations appeared to be available? Is there anything specific about financial policy that prevents more radical reforms? Drawing from Comparative Politics and Historical Institutionalism in particular, as well as International Political Economy, this book answers these questions by examining the particular institutional frictions that characterise global financial governance and influence the activity of change agents and veto players involved in the process of global regulatory change. The chapters in this volume collectively demonstrate that the process of change in financial rule-making as well as in the institutions governing finance does not fit with the punctuated model of policy change. The book also shows, however, that incremental changes can lead to fundamental shifts in the basic principles that inform global financial governance.

Asia Pacific Governance Jan 15 2021 This title was first published in 2002. With half of the world's population now living in Asia, governments have had to balance the drive for economic success with the rapidly increasing demands on resources and services. Important questions are being asked about how governments can best legislate to account for the rapid demographic and technological changes in the region. Uniting esteemed academics and practitioners from the region, "Asia Pacific Governance" addresses many of these vital and critical questions.

Crisis and Reform Jul 01 2022 Crisis and Reform provides an excellent overview of the ecclesiastical structures in Eastern Slavic lands from their Christianization to the late sixteenth century.

Educational Crisis and Reform Jun 19 2021 More than a third of out-of-school children of the world live in South Asia. The promise of universal quality education for all children of this region has so far been elusive. The crises in education faced by different countries of the region differ in their nature as well as import. Notwithstanding the differences, there are also some common denominators, such as the burgeoning population and growth of private sector in mass education. Along with the

growing list of problems that South Asian countries must resolve, the pressure for delivering better quality education for all in the region is escalating, in line with the imperatives of a global knowledge economy. But reforming education is not just a technical issue. In order for education reforms to gain momentum, the media, the general populace, and members of the policy-making community need to be more informed about the various dimensions of the educational challenges faced by South Asian societies. The book is a modest attempt to respond to this need. The contributions in this volume are research-based and strive at providing a deeper understanding of the various dimensions of the education crises as well as responses to them. Among the aims of this book are also to reach out to an audience outside of the academy. While it seeks to provide insights into country-specific initiatives, readers of this volume will also be able to help those concerned with and about education to think more clearly about the challenges of education reform in their own particular context.

The Appellate Body of the WTO and Its Reform Jul 29 2019 This is the first book that critically examines the reform of the Appellate Body (AB) of the World Trade Organization (WTO) in light of the current crisis resulting from the U.S. blocking of the appointment of its members. The reform of the AB is critical, as the appointment crisis could lead to the demise of “the jewel in the crown,” which may even cause the dismantling of the WTO as a whole. This book covers various aspects of the crisis and its reform. Specifically, as the crisis cannot be fully understood without reviewing the role of the AB from the broader perspectives of the other functions of the WTO, the book examines the reform of the AB from the broader perspectives of the WTO governance. Additional focus is on the reform of the AB in relation to its specific functions. Available options are provided to address the AB crisis, as well as discussion of wider implications beyond the WTO. Contributed by world-renowned academics, experts, and practitioners in the field of international economic law, this volume provides a comprehensive analysis of the AB crisis and its solutions.

Public Sector Reform in Ireland Feb 13 2021 This book provides a thematic case-study analysis of the wide-ranging public

sector reforms introduced in one of the states most deeply affected by the global financial crisis: the Republic of Ireland. It presents a timely and apposite examination of how a crisis can be used to overcome barriers and facilitate new reform agendas. The study draws upon unique insider access to the centre of Irish government, as well as interviews with over 60 key figures, to examine the implementation of those reforms over the 2011-16 period. The book opens with a contextual analysis of the creation of the Department of Public Expenditure and Reform. Subsequent chapters explore the process of shrinking the Irish state, renegotiating the political-administrative bargain, expenditure reforms, administrative culture reforms, and political reforms. This rich 'in action' study of a reform agenda undertaken during a period of crisis will appeal not only to students of executive politics, cutback management and public sector reform, but also to practitioners seeking to implement administrative reforms.

After the Crisis Dec 14 2020 This volume discusses the way forward for European countries as they face the challenges of a period of protracted growth in the wake of the economic and sovereign debt crisis.

Local Public Sector Reforms in Times of Crisis Mar 17 2021 This book compares the trajectories and effects of local public sector reform in Europe and fills a research gap that has existed so far in comparative public administration and local government studies. Based on the results of COST research entitled, 'Local Public Sector Reforms: an International Comparison', this volume takes a European-scale approach, examining local government in 28 countries. Local government has been the most seriously affected by the continuously expanding global financial crisis and austerity policies in some countries, and is experiencing a period of increased reform activity as a result. This book considers both those local governments which have adopted or moved away from New Public Management (NPM) modernization to 'something different' (what some commentators have labelled 'post-NPM'), as well as those which have implemented 'other-than-NPM measures', such as territorial reforms and democratic innovations.

Crisis, Reform and the Way Forward in Greece May 31 2022 This volume discusses different aspects of Greece's political economy during the past decade and reflects on the country's path ahead, examining the major question: did this challenging period succeed in providing a window of opportunity for deeper institutional and societal change? The authors seek to contribute to the discussion of the dynamics of stability and change, of the nexus between external pressure and domestic agency. Greece offers a most interesting case study, as much in analytical as in empirical terms. Never before did a euro area member require three macroeconomic adjustment programmes under stringent policy conditionality and external supervision. This experience shattered past certainties and reshaped the political landscape. A decade later Greece was

starting to recover and received international recognition for its reform efforts. However, the COVID-19 pandemic provided an external shock that risks derailing such achievements. The volume includes chapters by academics and researchers from different professional backgrounds: history, economics, public law, political science, public administration and political economy. Their diverse experience and viewpoints contribute to multidimensional analyses in subject areas such as Greece's constitutional structure, public sector reforms, labour market developments, China's expanding investment footprint and product market reforms.

Southern European Welfare States May 19 2021 This volume is the first in English to be devoted entirely to the analysis of social policy developments in southern Europe. It comes at an opportune moment, for not only are the southern European welfare states - in common with their northern counterparts - under stress, but they have also only recently become the object of in-depth studies, exploring for the first time the particularities of the southern 'type' or 'model' of welfare. This collection contributes to this growing literature on two levels: first, it provides a series of both comparative and specific country analyses, furnishing new empirical detail and more general reflections on the character of social policy and welfare in Greece, Italy, Portugal and Spain. Second, it buttresses the argument that although welfare states in the region share many of the features of other European welfare states, the existence of specific features, levels of development and institutional forms provide them, collectively, with a 'hugely different socio-political etiquette' which makes them worthy of analysis in their own right.

Economic Crisis and Structural Reforms in Southern Europe Oct 24 2021 In recent years the countries of southern Europe have undergone, with varying intensity, a serious and prolonged economic crisis. Most have had to implement comprehensive economic adjustment programmes, including a wide range of structural reforms. *Economic Crisis and Structural Reforms in Southern Europe* examines these reforms, drawing policy lessons from their successes and failures. This book employs two basic strands of analysis: issues of policy design, and political economy considerations. It considers the choice of timing and sequencing of reforms, the choice of the appropriate policy instruments, the pressure of interest groups and the political calculations involved in reforms. Featuring chapters in which contributors explore both national cases of specific structural reforms, and a comparative approach in order to evaluate similar reforms across countries, this important and topical work explores ongoing issues within the economy. Focusing on the challenges of designing and implementing structural reforms under conditions of crisis, this book will be of interest to policy makers and researchers from national and international organizations as well as academics and members of research institutes interested in the economics and politics of the Eurozone crisis.

Economic Crisis and the Politics of Reform in Egypt Jul 09 2020 This book examines the character and consequences of Egypt's economic reform and structural adjustment programme of 1991, along with the second stage of reforms in 1996. It contributes to the debates underpinning the political economy of economic reform and agricultural reform.

Crisis and Reform Feb 25 2022 The financial crisis that erupted in 2008 severely affected the global economy, plunging most countries into a recession with aftershocks still being felt today. Canada was able to weather the crisis well in comparison to many euro-zone countries and the United States, but it did not escape unscathed. Two major themes are explored in this volume: Canada's role in the international financial system and the Canadian policy response to the global financial crisis. These themes are examined in light of the shift from the classical gold standard to Bretton Woods to the "non-system" of late, the finance-trade crossover agenda, the changing role of central banks, the European Monetary Union, developing countries and a post-financial crisis global political economy. What becomes clear in this volume is that Canada plays a powerful role, which belies its size, in the development of the financial system and its regulation at an international level. *Crisis and Reform: Canada and the International Financial System* — the 28th volume of the influential *Canada Among Nations* series — examines the global financial crisis through Canada's historical and current role in the international financial system. Canada has been held up as a shining example of good governance during the financial crisis, and its prominent role within international financial institutions should grow as Canada continues as a leading player in the global financial system.

Science in the New Russia Nov 12 2020 This analysis of Russian science shows how the Russian science establishment was one of the largest in the world boasting a world-leading space programme and Nobel prizes. However, when the Soviet Union collapsed in 1991 the financial supports for the community were eliminated resulting in a 'brain drain'.

Crisis and Reform in Eastern Europe Aug 02 2022 Communism in Eastern Europe is in crisis. Its dimensions are social and economic; its manifestation is political. This volume, a collection of essays by leading authorities, describes the symptoms of the crisis, diagnoses the causes of the malady, and offers alternative scenarios for therapy. A unique dimension of this

collection is its avoidance of one-dimensional explanations. The contributors approach the subject from very different angles, and start from very distinct sociopolitical premises. The volume includes original accounts of unexplored aspects of East European communism as well as classic interpretations of the economic crisis and social stagnation that characterize the area. Contributions not only examine the sociopolitical behavior of the ruling apparatus, but also analyze its strategies, political culture, and the opposition. Both the professional and the general reader seeking more information about Eastern Europe will find this volume an extensive, in-depth portrait of the current situation in what many observers predict may develop into the major area of tension in post-World War II Europe.

Ending the Social Care Crisis Dec 26 2021 What lies behind England's crisis in adult social care, why has real change been so hard and what can be done? Ensuring effective, sustainable and affordable care and support for people of all ages is an urgent public policy challenge. This vital book outlines a different vision of social care as an essential part of the country's economic and social infrastructure that enables people to live good lives. Drawing on the history of social care, international comparisons and lived experience, it sets out a different road to reform that will secure political traction and public support for change.

Heterodox Analysis of Financial Crisis and Reform Feb 02 2020 The editors of this book have put together a compelling compendium of explanations and consequences of the global financial crisis. The essays are fairly homogeneous despite their apparent diversity, all providing a useful historical background. There is an obvious Institutionalist twist, with authors examining the changes in organizations and regulations that have accompanied the move towards financialization and money-manager capitalism. This analysis is often informed by the work of Hyman Minsky, pointing towards the inherent destabilizing forces of competition, as well as the dangers of deregulation, self-regulation, securitization, excess leverage, global imbalances, and the illusion of liquidity-enhancing and risk-reducing financial innovations. Marc Lavoie, University of Ottawa, Canada This valuable collection offers a stimulating range of heterodox views on the global financial crisis and proposals for reform of the financial system, nationally and internationally. The perspective of the authors is broadly Post Keynesian, sometimes with a radical or an institutionalist twist. Vigorously argued, clearly presented and largely non-technical, these essays provide a great deal of food for thought. John King, La Trobe University, Australia Though the worst of the financial crisis of 2008 has, with hope, ebbed, it has forever changed the economy in the United States and throughout the rest of the world. Using the financial and economic crisis as a catalyst, this volume examines how to better regulate the financial system and what to expect in the future if no steps are made toward reform. This book lays the foundation for those

steps by providing concrete ideas that will push policy in the direction of jobs growth and widespread prosperity. Paired with a history of financial market problems, *Heterodox Analysis of Financial Crisis and Reform* analyzes complacency regarding the state of the economy, its lack of jobs, growing income disparity, poverty and the consequences of the false but widely shared belief that the economy is self-regulating. This book suggests ways to account for the inherent instability of financial markets and how to make asset values less precarious. Examining both the macro and micro sides of financial instability, the authors argue that existing rules and regulations are either not applied or that they are not effective enough to prevent market fluctuations of the magnitude experienced in 2008. This volume also sheds new light on just how inextricably linked success on Wall Street and welfare on Main Street have become. Students and scholars of heterodox economics, historians, political scientists, policymakers and all those with an interest in an economic renaissance will find this thought-provoking analysis of significant interest.

The Chinese Economy in Crisis Aug 10 2020 This study argues that the decentralization that has taken place in China since 1980 threatens to undermine the future of reform and perhaps even the state itself. The authors contend that reform has undermined state capacity in China, and that the state's fiscal revenues will continue to decline.

China's Crisis Mar 05 2020 Nathan explored the roots of the Tiananmen tragedy in Deng Xiaoping's ten-year reform. How will cultural values and attitudes shape China's political development? What will be the impact of Taiwan, Hong Kong, and the West? Drawing on ground-breaking empirical research, Nathan measures the expectations of individual Chinese and their attitudes toward government and democracy.
