*Democratic Consolidation in Eastern Europe: Volume 2: International and Transnational Factors* Sep 25 2022 This is the second volume in a two-volume series of books on democratic consolidation in Eastern Europe. The first volume focused on the issue of institutional engineering. This second volume analyses the external parameters of democratic consolidation in thirteen Eastern European countries: how different international actors and various economic, cultural and security types of transnational pressures have shaped democratic politics in the region. The

aim is to contrast a set of democracy theories with empirical evidence accumulated in Eastern Europe over the last ten years. The volume tries to avoid complex debates about definitions, methods and the uses and misuses of comparative research. Instead it seeks to establish what has really happened in the region, and which of the existing theories are helpful in explaining these developments. The volume is divided into two parts. The first part presents a conceptual and comparative frame of analysis, the second consists of detailed studies of individual countries undergoing democratic consolidation. Case study chapters deal with the following countries: Estonia and Latvia, Hungary, Poland, the Czech Republic, Slovakia, Romania, Bulgaria and Macedonia, the states of former Yugoslavia, Belarus and Ukraine, and finally Russia. The concluding chapter identifies a set of variables responsible for the enormous impact of external factors on democratic consolidation in Eastern Europe. It conceptualises the interplay of internal and external factors impinging upon democracy, and shows the interplay of different positive and negative types of external pressures. It also evaluates the conscious Western effort to craft or engineer democracy in Eastern Europe.

*The Cambridge Economic History of Modern Europe: Volume 2, 1870 to the Present* Sep 20 2019 Unlike most existing textbooks on the economic history of modern Europe, which offer a country-by-country approach, The Cambridge Economic History of Modern Europe rethinks Europe's economic history since 1700 as unified and pan-European, with the material organized by topic rather than by country. This second volume tracks Europe's economic history through three major phases since 1870. The first phase was an age of globalization and of European economic and political dominance that lasted until the First World War. The second, from 1914 to 1945, was one of war, deglobalization, and depression and the third was one of growing integration not only within Europe but also between Europe and the global economy. Leading authors offer comprehensive and accessible introductions to these patterns of globalization and deglobalization as well as to key themes in modern economic history such as economic growth, business cycles, sectoral developments, and population and living standards.

International Business Law: Cases and Materials May 29 2020 INTERNATIONAL BUSINESS LAW: CASES AND MATERIALS is a timely and useful book. Uncounted millions of “international” transactions occur daily, as goods and services are purchased across the national boundaries of some 200 political units. Capital flows from nation to nation, and so—to a lesser extent—do jobs, as companies seek more favorable locations for their business operations. The “rules” (laws) governing these exchanges quickly become complex, as persons (and governments) from different countries are involved. If problems arise in a cross-border relationship, whose rules apply? What forums are available to resolve disputes? Are there tax implications to the transaction? If so, where? These and similar questions need to be factored into the decision to “go overseas.” Each of the six chapters in this book begins with a brief overview of the subject-matter, followed by short previews of the chosen case examples. The primary content of the chapters consists of some 120 court and arbitration decisions in real disputes, between real parties. The actual text of the decisions in these cases has been edited; some excerpts are quite brief, others are more substantial. Most “background” facts have been summarized by the author, but the edited-decision part of each case is quoted from the actual recorded text of the court or arbitrator who decided it. Clearly, a minute sample from tens of thousands of cases cannot provide comprehensive coverage of what all the world’s legal rules are. Our objectives here are simply to indicate some of the major potential “flash points” of doing international business, to illustrate some of the significant differences in the applicable legal rules, and to provide an exposure to the language and process by which international business disputes are resolved. “Fore-warned is fore-armed.” Being aware of these

potential trouble spots, a sensible business manager will presumably consider them in making the decision to engage in cross-border transactions, and take appropriate steps to avoid or minimize potential adverse consequences.

Chapter I of this book introduces International Law—its course of development and its two major sources (custom and treaties). Chapter II examines the use of national and international courts and arbitrators to resolve cross-border disputes. Chapter III provides basic coverage of the United Nations Convention on Contracts for the International Sale of Goods: when it applies, how the sale contract is formed, when risk of loss on the goods passes from Seller to Buyer, and what responsibilities the Seller has for the quality of the goods sold. Chapter IV looks at some of the legal questions that might arise in conducting cross-border commercial operations—employment issues, intellectual property issues, and investment issues. Chapter V considers potential questions regarding taxation of international activities, and the regulation of adverse environmental effects. Chapter VI reviews the efforts by national governments to apply their competition regulations to international business transactions, and the difficulties that private parties might have in attempting to enforce legal claims against governments and their agencies. While these are surely not the only legal issues that might arise in connection with international business, they do constitute a significant set of concerns of which managers need to be aware as they venture into the international “stream of commerce.”

This volume contains a large number of Lauterpacht's previously unpublished writings. As in earlier volumes the coverage is roughly in accordance with a plan Lauterpacht himself drew up for a possible textbook. The whole work continues the carefully organised presentation of the work of a very distinguished international lawyer.

Handbook of Biomedical Image Analysis Mar 07 2021 Our goal is to develop automated methods for the segmentation of three-dimensional biomedical images. Here, we describe the segmentation of confocal microscopy images of bee brains (20 individuals) by registration to one or several atlas images. Registration is performed by a highly parallel implementation of an entropy-based nonrigid registration algorithm using B-spline transformations. We present and evaluate different methods to solve the correspondence problem in atlas based registration. An image can be segmented by registering it to an individual atlas, an average atlas, or multiple atlases. When registering to multiple atlases, combining the individual segmentations into a registration can be achieved by atlas selection, or multiclass decision fusion.

We describe all these methods and evaluate these segmentation accuracies that they achieve by performing experiments with electronic phantoms as well as by comparing their outputs to a manual gold standard. The present work is focused on the mathematical and computational theory behind a technique for deformable image registration termed Hyperelastic Warping, and demonstration of the technique via applications in image registration and strain measurement. The approach combines well-established principles of nonlinear continuum mechanics with forces derived directly from three-dimensional image data to achieve registration. The general approach does not require the definition of landmarks, fiducials, or surfaces, although it can accommodate these if available. Representative

problems demonstrate the robust and flexible nature of the approach. Three-dimensional registration methods are introduced for registering MRI volumes of the pelvis and prostate. The chapter first reviews the applications, xi Preface challenges, and previous methods of image registration in the prostate.

entries. Numerous cross-references lead the reader to relevant entries, and the abundant references to primary sources, mostly treaties and court cases, enable the reader to locate research materials. The selected bibliography includes books, research aids, textbooks, and casebooks as well as recent books on special international law topics. Contemporary Developments and Perspectives in International Health Security Feb 06 2021 Since the publication of the first volume of Contemporary Developments and Perspectives in International Health Security, a lot has happened in this rapidly evolving area. Perhaps the most dominant global event of the past eighteen months is the COVID-19 pandemic. Within this general context, the importance of the multiple and diverse international health security (IHS) subdomains is becoming evident, especially when one begins to appreciate the interconnectedness of the modern world and the interdependence of various existing societal systems. Moreover, this complexity presents our civilization with both dangers and opportunities, and among the most pronounced opportunities is our ability to effectively “work together and coordinate” as humanity. With a goal to summarize and synthesize our collective experiences from the COVID-19 pandemic, this second tome of Contemporary Developments and Perspectives in International Health Security is a repository of knowledge and a practical resource for those who seek to learn about the current pandemic as well as for those who may already be preparing for the “next pandemic” or as yet unforeseen IHS threats. In addition to the COVID-19 global response, topics discussed in this book include climate change, mental health, supply chain management, and clinical diagnostics, among others.

Uncomfortable Wars Revisited Apr 08 2021 Since the end of the Cold War, and especially since September 11, 2001, the United States has faced daunting challenges in the areas of foreign policy and national security. Threatened by failing states, insurgencies, civil wars, and terrorism, the nation has been compelled to re-evaluate its traditional responses to global conflict. In this timely book, John T. Fishel and Max G. Manwaring present a much-needed strategy for conducting unconventional warfare in an increasingly violent world. In the early 1990s, Manwaring introduced a new paradigm for addressing low-intensity conflicts, or conflicts other than major wars. Termed the Manwaring Paradigm or SWORD (Small Wars Operations Research Directorate) model, it has been tested successfully by scholars and practitioners and refined in the wake of new and significant "uncomfortable wars" around the world, most notably the conflicts in Afghanistan and Iraq. Uncomfortable Wars Revisited broadens

the definition of the original paradigm and applies it to specific confrontations
