In Pursuit of the PhD Oct 26 2019 What percentage of graduate students entering PhD programs in the arts and sciences at leading universities actually complete their studies? How do completion rates vary by field of study, scale of graduate program, and type of financial support provided to students? Has the increasing reliance on Teaching Assistantships affected completion rates and time-to-degree? How successful have national fellowship programs been in encouraging students to finish their studies in reasonably short periods of time? What have been the effects of curricular developments and shifts in the state of the job market? How has the overall "system" of graduate education been affected by the expansion of the 1960s and the subsequent contraction in enrollments and degrees conferred? Is there "excess capacity" in the system at the present time? This major study seeks to answer fundamental questions of this kind. It is based on an exhaustive analysis of an unparalleled data set consisting of the experiences in graduate school of more than 35,000 students who entered programs in English, history, political science, economics, mathematics, and physics at ten leading universities between 1962 and 1986. In addition, new information has been

obtained on the graduate student careers of more than 13,000 winners of prestigious national fellowships such as the Woodrow Wilson and the Danforth. It is the combination of these original data sets with other sources of national data that permits fresh insights into the processes and outcomes of graduate education. The authors conclude that opportunities to achieve significant improvements in the organization and functioning of graduate programs exist--especially in the humanities and related social sciences--and the final part of the book contains their policy recommendations. This will be the standard reference on graduate education for years to come, and it should be read and studied by everyone concerned with the future of graduate education in the United States. Originally published in 1992. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. The Complete Guide to Graduate School Admission Aug 24 2019 Should I go to graduate school? How do I choose where to apply? Are my grades and accomplishments good enough to get in? Who should I ask to write recommendation letters for me, and how should I approach these people? How do I write my "personal statement?" When will I hear my fate, and how should I make my final decision? These are just a few of the many questions to which this well-researched, thorough, and extremely user-friendly book offers answers. Students who are contemplating graduate training in psychology, counseling, and related fields are often apprehensive and confused about applying to graduate school, but this book takes the guesswork and anxiety out of the process. The tone and features (such as the Q&A format, timeline for application-related tasks and activities, and special advice for special populations) that made the first edition so successful, eliciting hundreds of thank-you notes and e-mail messages to the author, are just as evident in this new edition. The book has been thoroughly updated to include coverage of new topics such as use of the internet and e-mail, as well as changing trends in the professions. The most obvious difference is that the book is now significantly shorter as a result of meticulous rewriting, making it even easier to use. There have been attempts since the publication of the first edition to copy the format of this book, but none of the others have successfully duplicated the depth of research-based advice and the supportive style that make this book the guide of choice for thousands of graduate-school bound students and their advisors.
