**Cities at War** Oct 31 2019 Warfare in the twenty-first century goes well beyond conventional armies and nation-states. In a world of diffuse conflicts taking place across sprawling cities, war has become fragmented and uneven to match its settings. Yet the analysis of failed states, civil war, and state building rarely considers the city, rather than the country, as the terrain of battle. In *Cities at War*, Mary Kaldor and Saskia Sassen assemble an international team of scholars to examine cities as sites of contemporary warfare and insecurity. Reflecting Kaldor's expertise on security cultures and Sassen's perspective on cities and their geographies, they develop new insight into how cities and their residents encounter instability and conflict, as well as the ways in which urban forms provide possibilities for countering violence. Through a series of case studies of cities including Baghdad, Bogotá, Ciudad Juarez, Kabul, and Karachi, the book reveals the unequal distribution of insecurity as well as how urban capabilities might offer resistance and hope. Through analyses of how contemporary forms of identity, inequality, and segregation interact with the built environment, *Cities at War* explains why and how political violence has become increasingly urbanized. It also points toward the capacity of the city to shape a different kind of urban subjectivity that can serve as a foundation for a more peaceful and equitable future.

*Training and the Private Sector* Aug 22 2021 How can today's workforce keep pace with an increasingly competitive global economy? As new technologies rapidly transform the workplace, employee requirements are changing and workers must adapt to different working conditions. This volume compares new evidence on the returns from worker training in the United States, Germany, France, Britain, Japan, Norway, and the Netherlands. The authors focus on Germany's widespread, formal apprenticeship programs; the U.S. system of learning-by-doing; Japan's low employee turnover and extensive company training; and Britain's government-led and school-based training schemes. The evidence shows that, overall, training in the workplace is more effective than training in schools. Moreover, even when U.S. firms spend as much on training as other countries do, their employees may still be less skilled than workers in Europe or Japan. *Training and the Private Sector* points to training programs in Germany, Japan, and other developed countries as models for creating a workforce in the United States that can compete more successfully in today's economy.

Each chapter

*Americana* Jun 19 2021 As a boy in post-War England, legendary Kinks singer/songwriter Ray Davies fell in love with America " its movies and music, its culture of freedom fed his imagination. Some of the most fascinating characters in pop culture and the British Invasion make appearances, from the famous to the behind-the-scenes players. The book is interspersed with lyrics and also includes photographs from Davies's own collection and the Kinks's archive. **The Book of L** Oct 24 2021 This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this

suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Neuropsychological Assessment of Dementia and Depression in Older Adults Nov 12 2020 Two of the most common psychological disorders of later life are dementia and depression. The diagnosis of these conditions presents a challenge to clinicians because the symptoms of depression and dementia often overlap; in addition, the symptoms of either of these disorders in their early stages may be attributed to the normal effects of aging. [This book] reviews the most up-to-date research on the diagnosis of dementia and depression [in older adults] and offers concrete recommendations for evaluating this unique population. The contributors to this volume, all experts in the psychological assessment of older adults, give clinicians and practitioners clear and practical guidance on differentiating psychological disorders from normal events in the aging process, identifying symptoms of depression and symptoms of dementia, performing differential assessment of dementia and depression, determining legal competency of older adults, providing clinical interpretations to clients and their families, and applying assessment to therapy and interventions.

**Genealogy Standards Second Edition** Feb 02 2020 Family historians depend upon thousands of people unknown to them. They exchange research with others; copy information from books and databases; and write libraries, societies, and government offices. At times they even hire professionals to do legwork in distant areas and trust strangers to solve important problems. But how can a researcher be assured that he or she is producing or receiving reliable results? This official manual from the Board of Certification for Genealogists provides a standard by which all genealogists can pattern their work.

**Reclaiming the Black Past** Oct 12 2020 The past and future of Black history In this information-overloaded twenty-first century, it seems impossible to fully discern or explain how we know about the past. But two things are certain. Whether we are conscious of it or not, we all think historically on a routine basis. And our perceptions of history, including African American history, have not necessarily been shaped by professional historians. In this wide-reaching and timely book, Pero Gaglo Dagbovie argues that public knowledge and understanding of black history, including its historical icons, has been shaped by institutions and individuals outside academic ivory towers. Drawing on a range of compelling examples, Dagbovie explores how, in the twenty-first century, African American history is regarded, depicted, and juggled by diverse and contesting interpreters—from museum curators to filmmakers, entertainers, politicians, journalists, and bloggers. Underscoring the ubiquitous nature of African-American history in contemporary American thought and culture, each chapter unpacks how black history has been represented and remembered primarily during the “Age of Obama,” the so-called era of “post-racial” American society. Reclaiming the Black Past is Dagbovie's contribution to expanding how we understand African American history during the new millennium.

**Global Tax Fairness** Feb 25 2022 This book addresses sixteen different reform proposals that are urgently needed to correct the fault lines in the international tax system as it exists today, and which deprive both developing and developed countries of critical tax resources. It offers clear and concrete ideas on how the reforms can be achieved and why they are important for a more just and equitable global system to prevail. The key to reducing the tax gap and consequent human rights deficit in poor countries is global financial transparency. Such transparency is essential to curbing illicit financial flows that drain less developed countries of capital and tax revenues, and are an impediment to sustainable development. A major break-through for financial transparency is now

While the reforms are realistic they require both political and an informed and engaged civil society that can put pressure on governments and policy makers to act.

**The Spirit of the Brush** Nov 24 2021 "Chinese ink painting is one of the oldest continually practiced art forms in the world. It first appeared in China in the fifth century, and soon traveled to Korea and then to Japan. As old and deeply rooted in East Asian aesthetics and meditation as it is, ink painting is credited with influencing the development of Western modern art. Its minimalist approach to painting continues to have enormous appeal. Artist and teacher Sungsook Setton, who learned the techniques with Chinese and Korean masters in her native South Korea, brings new excitement to this age-old art. While teaching the traditional disciplines for holding and using the brush, she shows students how to turn the techniques and inner meditation toward interpreting their own world: city views, music, and the essence of contemporary life"--
