Frontiers in Oncology Breast Cancer Awareness Month, Special Edition Jul 17 2021 Foreword from the Editors: The start of October marks the commencement of Breast Cancer Awareness month, an annual month-long event to raise awareness and express support for those that have been affected by breast cancer in one way or another. Thanks to the incredible work and efforts by the scientific community, we have greatly enhanced our ability to detect breast cancer in its earliest stages, and have been able to develop simple routine screening techniques to ensure that everyone, even those in areas where resources are scarce, can identify early signs of a tumor forming. Our ability to treat breast cancer has greatly improved, becoming more sophisticated and precise. The advent of state-of-the-art imaging instruments, advanced surgical techniques, and immunotherapy means that we are able to treat patients better, being mindful of the plethora of difficulties that arise for breast cancer survivors. Breast cancer, despite tremendous advances in recent decades, remains one of the most common cancer types across the globe, and efforts by the scientific community require continued support in order to guarantee further advances. In this Special Edition, we present selected articles looking at breast cancer from all angles. Coming from a diverse set of authors, this Special Edition includes manuscripts evaluating nation-wide screening programs, advanced surgical techniques, the future direction of molecular targeting, and more. We would also like to take this opportunity to thank everyone in the wider community for their continued efforts in allowing for accelerated scientific developments, and most importantly for supporting everyone affected both directly and indirectly. Paula R. Pohlman and Sarah M. Temkin

The Monthly Sky Guide; 10th Edition Nov 01 2022 "Ian Ridpath and Wil Tirion — two consummate professionals in the field — have teamed up to produce an exemplary text with first-rate illustrations to inspire the beginning sky-gazer. I heartily recommend this text." — Neil English, Astronomy Now magazine A user-friendly companion for stargazers of all ages, this

classic beginner's guide describes all the main sights of the night sky. The newly updated book contains a chapter for each month, describing prominent stars, constellations, star clusters, nebulae, and galaxies. Readers will discover when to watch meteor showers, when eclipses will occur, and how to follow the movements of the four brightest planets (Venus, Mars, Jupiter, and Saturn). Most of the sights are visible to the naked eye, and all can be seen with binoculars or a small telescope. Sections on observing the Moon and the planets include 50 easy-to-use maps that introduce the skies of the Northern Hemisphere and a comprehensive guide to observing the Moon. "The star maps are first quality ... I find them to be a pleasure to look at and use. If you have a young person or friend you would like to share your love of astronomy with, get them a pair of binoculars and this book and you'll have a stargazing friend for life." — Mike Simonsen, *Slacker Astronomy*

Patroclus, an awkward young prince, has been exiled to the court of King Peleus and his perfect son Achilles. Despite their differences, Achilles befriends the shamed prince, and as they grow into young men skilled in the arts of war and medicine, their bond blossoms into something deeper - despite the displeasure of Achilles's mother Thetis, a cruel sea goddess. But when word comes that Helen of Sparta has been kidnapped, Achilles must go to war in distant Troy and fulfill his destiny. Torn between love and fear for his friend, Patroclus goes with him, little knowing that the years that follow will test everything they hold dear.

Looking Through You: The Beatles Book Monthly Photo Archive Oct 20 2021 In 1963, it was unusual for a pop group to have a monthly magazine devoted exclusively to their career. Only Elvis Presley had been considered important enough to warrant such an honour. But then the Beatles were unusual. Within the space of that pivotal year, the Fab Four became the biggest thing in British popular culture and their worldwide fame was soon inescapable. One of the first to astutely recognise their greatness was Sean O'Mahony and the monthly magazine he launched with the full blessing of The Beatles and their manager Brian

Epstein - The Beatles Book. Looking Through You presents a selection of over 300 images from the precious Beatles Book photo archive, many unpublished or unseen in their original form from the original negatives, as well as the story behind the success of the regular Beatle bulletin. With each new issue, Beatle fans worldwide would voraciously devour the contents from cover-to-cover, discovering the Fab Four's latest news and activities and most of all, savouring the exclusive B&W photographs, captured by in-house photographer, Leslie Bryce. During the magazine's six-year run only a small fraction of these photographs were printed - and then often altered in some way. The Beatles Book Monthly captured the Beatles' development from British provincial theatres - through foreign tours including their ground-breaking first American visit - and onwards to the band's withdrawal into the recording studio. It was unique in its access - as well as concert tours and television shows, the band were photographed off duty, at their homes and in the studio - locales that were generally out-of-bounds to most Beatle observers. This unique and original photographic record preserves many important moments within the Beatles' career, providing a historically important glimpse into the world's greatest ever entertainment phenomenon.
