OLED Displays and Lighting Jul 05 2020 Explains the fundamentals and practical applications of flat and flexible OLEDs for displays and lighting Organic light-emitting diodes (OLEDs) have emerged as the leading technology for the new display and lighting market. OLEDs are solid-state devices composed of thin films of organic molecules that create light with the application of electricity. OLEDs can provide brighter, crisper displays on electronic devices and use less power than conventional light-emitting diodes (LEDs) or liquid crystal displays (LCDs) used today. This book covers both the fundamentals and practical applications of flat and flexible OLEDs. Key features: Covers all of the aspects necessary to the design and manufacturing of OLED displays and lighting. Explains the fundamental basic technologies and also related technologies which might contribute to the next innovation in the industry. Provides several indications for future innovation in the OLED industry. Includes coverage of OLED vacuum deposition type and solution type materials. The book is essential reading for early career engineers developing OLED devices and OLED related technologies in industrial companies, such as OLED device fabrication companies.

Innovation and Industrialization in Asia Apr 01 2020 Existing accounts of East Asia's meteoric growth and structural change has either been explained as one dictated essentially by markets with strong macroeconomic fundamentals, or a consequence of proactive governments. This book departs from such a dichotomy by examining inductively the drivers of the experiences. Given the evolutionary treatment of each economic good and service as different, this book examines technological catch up with a strong focus on the industries contributing significantly to the economic growth of the countries selected in Asia. The evidence produced supports the evolutionary logic of macro, meso and micro interactions between several institutions, depending on the actors involved, structural location and typology of taxonomies and trajectories. The book carefully picks out experiences from the populous economies of China, India and Indonesia, the high income economies of Korea and Taiwan, the middle income economies of Malaysia and Thailand, and the transitional least developed country of Myanmar. Chapters 1-7 of this book were originally published as a special issue of *Journal of the Asia Pacific Economy*.

Samsung Electronics and the Struggle for Leadership of the Electronics Industry Apr 25 2022 This book views Samsung Electronics in terms of corporate life cycle as well as product portfolio and strategy. It also examines the issues Samsung faces as it proceeds further into the 21st century. Written from the perspective of an experienced commentator on Korean and global business, this book presents not simply a narrative or an adulatory and uncritical account of Samsung's rise, but a considered analysis of the secrets of success that both business students and CEOs will want to read and consider applying to their own companies.

Flat Panel Display Manufacturing Aug 06 2020 An extensive introduction to the engineering and manufacture of current and next-generation flat panel displays This book provides a broad overview of the manufacturing of flat panel displays, with a particular emphasis on the display systems at the forefront of the current mobile device revolution. It is structured to cover a broad spectrum of topics within the unifying theme of display systems manufacturing. An important theme of this book is treating displays as systems, which expands the scope beyond the technologies and manufacturing of traditional display panels (LCD and OLED) to also include key components for mobile device applications, such as flexible OLED, thin LCD backlights, as well as the manufacturing of display module assemblies. *Flat Panel Display Manufacturing* fills an important gap in the current book literature describing the state of the art in display manufacturing for today's displays, and looks to create a reference the development of next generation displays. The editorial team brings a broad and deep perspective on flat panel display manufacturing, with a global view spanning decades of experience at leading institutions in Japan, Korea, Taiwan, and the USA, and including direct pioneering contributions to the development of displays. The book includes a total of 24 chapters contributed by experts at leading manufacturing institutions from the global FPD industry in Korea, Japan, Taiwan, Germany, Israel, and USA. Provides an overview of the evolution of display technologies and manufacturing Treats display products as systems with manifold applications, expanding the scope beyond traditional display panel manufacturing to key components for mobile devices and TV applications Provides a detailed overview of LCD manufacturing, including panel architectures, process flows, and module manufacturing Provides a detailed overview of OLED manufacturing for both mobile and TV applications, including a chapter dedicated to the young field of flexible OLED manufacturing Provides a detailed overview of the key unit processes and corresponding manufacturing equipment, including manufacturing test & repair of TFT array panels as well as display module inspection & repair Introduces key topics in display manufacturing science and engineering, including productivity & quality, factory architectures, and green manufacturing *Flat Panel Display Manufacturing* will appeal to professionals and engineers in R&D departments for display-related technology development, as well as to graduates and Ph.D. students specializing in LCD/OLED/other flat panel displays.

Beginning Samsung ARTIK Sep 06 2020 Discover which ARTIK modules to use for various applications, and how to produce code for them. This book goes beyond the information previously available online, efficiently guiding developers from initial setup of their development environment to product development and prototyping in no time. Beginners will find helpful background insights into foundation technology and useful reference information is included for more advanced developers. Samsung's announcement of the new ARTIK modules for IoT has generated tremendous interest in the developer market for wearable and other consumer or industrial devices. This book provides the perfect tutorial-based introduction to the ARTIK family of "Systems on Modules," which integrate powerful microprocessors, memory, wireless

connectivity, and enhanced security on to very small form factor boards. With Beginning Samsung ARTIK as your guide, take the next steps to creating great solutions with an ARTIK. What You'll Learn Use terminal emulators to access the command line and talk to the device Establish Wi-Fi connectivity with a wireless network Upgrade the operating system and install additional software Bring up Eclipse IDE and create a cross-compiler toolchain on Mac OS X Cross-compile for the ARM processors in the ARTIK modules using Arduino IDE with libArduino to C Use C to access the ARTIK hardware via a file based API Use Node.js and Python inside the ARTIK module Integrate applications with the Samsung SAMI data aggregation hub Use Temboo to generate IoT software solutions that can be downloaded and compiled natively inside the ARTIK Debug applications with software and hardware probes Who This Book Is For Moderately experienced developers wanting to understand ARTIK and how to interact with it from within their own apps or web services.

Abusing the Internet of Things Jan 11 2021 This book is a marvellous thing: an important intervention in the policy debate about information security and a practical text for people trying to improve the situation. — Cory Doctorow author, co-editor of Boing Boing A future with billions of connected "things" includes monumental security concerns. This practical book explores how malicious attackers can abuse popular IoT-based devices, including wireless LED lightbulbs, electronic door locks, baby monitors, smart TVs, and connected cars. If you're part of a team creating applications for Internet-connected devices, this guide will help you explore security solutions. You'll not only learn how to uncover vulnerabilities in existing IoT devices, but also gain deeper insight into an attacker's tactics. Analyze the design, architecture, and security issues of wireless lighting systems Understand how to breach electronic door locks and their wireless mechanisms Examine security design flaws in remote-controlled baby monitors Evaluate the security design of a suite of IoT-connected home products Scrutinize security vulnerabilities in smart TVs Explore research into security weaknesses in smart cars Delve into prototyping techniques that address security in initial designs Learn plausible attacks scenarios based on how people will likely use IoT devices

Handbook of State Aid for Film Jan 23 2022 This book is an analysis of the specificities of public film funding on an international scale. It shows how public funding schemes add value to film-making and other audio-visual productions and provides a comprehensive analysis of today's global challenges in the film industry such as industry change, digital transformation, and shifting audience tastes. Based on insights from fields such as cultural economics, media economics, media management and media governance studies, the authors illustrate how public spending shapes the financial fitness of national and international film industries. This highly informative book will help both scholars and practitioners in the film industry to understand the complexity of issues and the requirements necessary to preserve the social benefits of film as an important cultural good.

The Procrastination Economy Jul 25 2019 2018 Outstanding Academic Title, given by Choice Magazine How mobile devices make our in-between moments valuable to media companies while also providing a sense of control and connection In moments of downtime – waiting for a friend to arrive or commuting to work – we pull out our phones for a few minutes of distraction. Just as television reoriented the way we think about living rooms, mobile devices have taken over the interstitial spaces of our everyday lives. Ethan Tussey argues that these in-between moments have created a procrastination economy, an opportunity for entertainment companies to create products, apps, platforms, subscription services, micropayments, and interactive opportunities that can colonize our everyday lives. But as businesses commoditize our free time, and mobile devices become essential tools for promotion, branding and distribution, consumers are using these devices as a means of navigating public and private space. These devices are not just changing the way we spend and value our time, but also how we interact with others and transform our sense of the politics of space. By examining the four main locations of the procrastination economy—the workplace, the commute, the waiting room, and the “connected” living room—Ethan Tussey illuminates the relationship between the entertainment industry and the digitally empowered public.

Sony vs Samsung Feb 09 2021 "Sony vs. Samsung is business history at its best! It explores the divergent fortunes of these two electronics giants in the last decade and identifies the true reasons behind Sony's decline and Samsung's rise. Contrary to popular belief, Chang shows that success (or failure) does not simply arise from different strategies. Rather, it emerges from major decisions that are deeply rooted in the companies' organizational processes and their executives' political behavior. This book is a must-read for any senior executive." —Constantinos Markides, Robert P. Bauman Professor of Strategic Leadership and Chairman, Strategy Department, London Business School "Sea-Jin Chang has produced that rarity in a business book--one that is as valuable to practicing managers as it is insightful to academic researchers. In this fascinating comparison of two modern global giants, he applies his high resolution research microscope to their changing fortunes by dissecting their contrasting strategies, and providing interesting insights into their divergent organizational processes and management practices. This is a very valuable contribution to the international business literature. It will end up in as many corporate boardrooms as faculty seminars." —Christopher A. Bartlett, Thomas D. Casserly Professor Emeritus, Harvard Business School "Sea-Jin Chang has written a fascinating comparison of Sony and Samsung that will be valuable to anyone interested in strategy,

organizations or international business. The interwoven and very detailed case studies of two very different companies in overlapping industries illuminate problems such as adaptation to technological change (analog to digital), organizational flexibility and globalization. His attempt to analyze both strategic development and implementation is successful and very useful. Both academics and practitioners will learn a lot from this book." —Stephen J. Kobrin, William Wurster Professor of Multinational Management, The Wharton School, University of Pennsylvania "Refreshingly original and entertaining, this book analyzes major strategic decisions of Samsung and Sony and highlights organizational processes and top management leadership that have shaped their performances. This is a must-read for all executives who want to understand the strengths and weaknesses of Asian competitors. It also provides penetrating insights to other Asian companies with global ambitions." —Myoung Woo Lee, President and CEO, iriver

Gandhi Meets Primetime Oct 20 2021 Shanti Kumar's Gandhi Meets Primetime examines how cultural imaginations of national identity have been transformed by the rapid growth of satellite and cable television in postcolonial India. To evaluate the growing influence of foreign and domestic satellite and cable channels since 1991, the book considers a wide range of materials including contemporary television programming, historical archives, legal documents, policy statements, academic writings and journalistic accounts. Kumar argues that India's hybrid national identity is manifested in the discourses found in this variety of empirical sources. He deconstructs representations of Mahatma Gandhi as the Father of the Nation on the state-sponsored network Doordarshan and those found on Rupert Murdoch's STAR TV network. The book closely analyzes print advertisements to trace the changing status of the television set as a cultural commodity in postcolonial India and examines publicity brochures, promotional materials and programming schedules of Indian-language networks to outline the role of vernacular media in the discourse of electronic capitalism. The empirical evidence is illuminated by theoretical analyses that combine diverse approaches such as cultural studies, poststructuralism and postcolonial criticism.

Dynamics of Economic Spaces in the Global Knowledge-based Economy Nov 20 2021 This book addresses how economic spaces dynamically change within the context of the global knowledge-based economy. Specifically, it centers the discussion on integrated views of understanding and conceptualizing dynamic changes of global economy under the global megatrends of globalization, knowledge-based economy, information society, service world, climate change, and population aging. Focusing on East Asia, especially on Korea, it deals with case studies regarding the processes and patterns of these global dynamics, looking at economic spaces of various spatial scales and types of economic actors. This book develops a theoretical model for understanding and analysing the dynamics of economic spaces that are being reshaped within the larger global economy. It also emphasizes the analysis of empirical studies at the level of firm, region, and state by considering an evolutionary perspective over time. In developing its theoretical framework, this book examines regional resilience, intangible assets, service innovation, path dependence, and other notions related to the evolution of economic spaces, and incorporates these elements into real-world case studies. The integrated theoretical framework examined here contributes a new perspective on spatial disparities in the global economy. An integral model of service innovation; the integration of path dependence and regional resilience; the interaction between firm and region for the accumulation of intangible assets; and the roles of governments and global firms: these are all essential to understanding the dynamics of economic spaces in East Asia. The theoretical model and case studies in this book suggest policy implications for developing countries, especially in the Asian and African regions, with regard to regional development and innovation policies.
