Action Research: A Methodology For Change And Development Nov 12 2020 This book presents a fresh view of action research as a methodology uniquely suited to researching the processes of innovation and change. Drawing on twenty-five years' experience of leading or facilitating action research projects, Bridget Somekh argues that action research can be a powerful systematic intervention, which goes beyond describing, analyzing and theorizing practices to reconstruct and transform those practices. The book examines action research into change in a range of educational settings, such as schools and classrooms, university departments, and a national evaluation of technology in schools. The opening chapter presents eight methodological principles and discusses key methodological issues. The focus then turns to action research in broader contexts such as 'southern' countries, health, business and management, and community development. Each chapter thereafter takes a specific research project as its starting point and critically reviews its design, relationships, knowledge outcomes, political engagement and impact. Action Research is important reading for postgraduate students and practitioner researchers in education, health and management, as well as those in government agencies and charities who wish to research and evaluate change and development initiatives. It is also valuable for pre-service and in-service training of professionals such as teachers, nurses and managers.

The Collected Essays of Harvey Leibenstein: Population, development and welfare Sep 30 2019

Digital Technologies and Institutions for Sustainable Development Jun 27 2019 This book focuses on digital institutions and the advanced technologies used on their basis, as well as their contribution to sustainable development in the unity of seventeen SDGs formulated by the UN, which is sequentially disclosed in six parts of the book. This book is dedicated to comprehensive coverage of the role of the digital economy in sustainable development and the offering of a set of scientific, methodological, and practical recommendations to increase the scale and effectiveness of this role. The first part explores the training of digital personnel for sustainable development, the second part reveals the regional features of Russia, and the third part describes the industry specifics of using digital technologies in entrepreneurship in support of sustainable development. The fourth part deals with financial, organizational, and managerial issues of using digital technologies in entrepreneurship in support of sustainable development, the fifth part is devoted to security, international factors, and risks, and the sixth part deals with the legal framework and state regulation of digital technologies and sustainable development institutions. The novelty of the book lies in its reliance on an institutional approach that allows rethinking and systematically studying the contribution of the digital economy to sustainable development. The book is aimed at scholars who will find in it an institutional understanding of the digital economy's support for sustainable development and ways to improve it. The secondary target audience of the book is the subject of managing the sustainable development of the digital economy. For them, the book contains relevant and illustrative examples from practice and applied recommendations.

The Promise of Adolescence Jun 07 2020 Adolescence "beginning with the onset of puberty and ending in the mid-20s" is a critical period of development during which key areas of the brain mature and develop. These changes in brain structure, function, and connectivity mark adolescence as a period of opportunity to discover new vistas, to form relationships with peers and adults, and to explore one's developing identity. It is also a period of resilience that can ameliorate childhood setbacks and set the stage for a thriving trajectory over the life course. Because adolescents comprise nearly one-fourth of the entire U.S. population, the nation needs policies and practices that will better leverage these developmental opportunities to harness the promise of adolescence "rather than focusing myopically on containing its risks. This report examines the neurobiological and socio-behavioral science of adolescent development and outlines how this knowledge can be applied, both to promote adolescent well-being, resilience, and development, and to rectify structural barriers and inequalities in opportunity, enabling all adolescents to flourish.

The Aesthetics of Development: Art, Culture and Social Transformation Apr 05 2020 Through a unique range of theoretical and practical case studies, this collection considers the relationship between the arts (understood as the visual arts, crafts, theatre, dance, and literature) and development, creating both a bridge between them that is rarely explored and filling in concrete ways the content of the "culture" part of the equation "culture and development." It includes manifestations of culture and the ways in which they relate to development, and in turn contribute to such pressing issues as poverty alleviation, concern for the environment, health, empowerment, and identity formation. It shows how the arts are an essential part of the concrete understanding of culture, and as such a significant part of development thinking - including the development of culture, and not only of culture as an instrumental means to promote other development goals.

Financial Development and Economic Growth in Malaysia Aug 29 2019 This book is concerned with the role of financial intermediation in economic development and growth in the context of Malaysia. Using an analytical framework, the author investigates the Malaysian economy from 1960 onwards to examine how far financial development has progressed in the course of economic development, and whether it has been instrumental in promoting economic growth. A significant improvement in the Malaysian financial system, coupled with rapid economic growth and a rich history of financial sector reforms, makes Malaysia an interesting case study for this subject. The author shows that some government interventions seem to have impacted negatively on economic growth, whereas repressionist financial policies such as interest rate controls, high reserve requirements and directed credit programmes seem to have contributed positively to financial development. The analysis concludes that financial development leads to higher output growth via promoting private saving and private investment. Shedding light on the evolutionary role of financial system and the interacting mechanisms between financial development and economic growth, this book will be of interest to those interested in economic and financial development, financial liberalization, saving behaviour and investment analysis and Asian Studies.

Modern Algebra. In Part a Development From Lectures by E. Artin and E. Noether; Translated From the 2d Rev. German Ed. by Fred Blum, With Revisions and Additions by the Author; 1 Apr 17 2021 This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Guide to Techniques in Mouse Development, Part A Nov 24 2021 Guide to Techniques in Mouse Development, Part A comprehensively covers new technologies and methodologies that have appeared for the study of mouse development. Update of volume 225 of Methods in Enzymology, Guide to Techniques in Mouse Development, edited by P.M. Wassarman and M.L. DePamphilis and published in 1993 Covers new technologies and methodologies, including: new techniques for the cryopreservation of gametes and embryos production of transgenic and null (knockout) animals (use of ES cells) generation of conditional/inducible mutant animals use of gene-trap mutagenesis analysis of allele-specific expression use of new reporter constructs humanizing of transgenic animals transcript profiling of mouse development imaging of mouse development rederivation of animals and use of mouse genomics

Discovering the Brain May 19 2021 The brain ... There is no other part of the human anatomy that is so intriguing. How does it develop and function and why does it sometimes, tragically, degenerate? The answers are complex. In *Discovering the Brain*, science writer Sandra Ackerman cuts through the complexity to bring this vital topic to the public. The 1990s were declared the "Decade of the Brain" by former President Bush, and the neuroscience community responded with a host of new investigations and conferences. *Discovering the Brain* is based on the Institute of Medicine conference, Decade of the Brain: Frontiers in Neuroscience and Brain Research. *Discovering the Brain* is a "field guide" to the brain "an easy-to-read discussion of the brain's physical structure and where functions such as language and music appreciation lie. Ackerman examines: How electrical and chemical signals are conveyed in the brain. The mechanisms by which we see, hear, think, and pay attention" and how a "gut feeling" actually originates in the brain. Learning and memory retention, including parallels to computer memory and what they might tell us about our own mental capacity. Development of the brain throughout the life span, with a look at the aging brain. Ackerman provides an enlightening chapter on the connection between the brain's physical

condition and various mental disorders and notes what progress can realistically be made toward the prevention and treatment of stroke and other ailments. Finally, she explores the potential for major advances during the "Decade of the Brain," with a look at medical imaging techniques "what various technologies can and cannot tell us" and how the public and private sectors can contribute to continued advances in neuroscience. This highly readable volume will provide the public and policymakers and many scientists as well "with a helpful guide to understanding the many discoveries that are sure to be announced throughout the "Decade of the Brain."

Development for Academic Leaders Mar 05 2020 DEVELOPMENT FOR ACADEMIC LEADERS In addition to their other duties, academic leaders are expected to network with potential donors and to be productive and enthusiastic fundraisers. More often than not, however, academic leaders are given little or no training on how to be savvy fundraisers for their institutions. Development for Academic Leaders is a much-needed resource that offers a concise yet comprehensive guide to fundraising for those who are new to the process. The book clarifies roles, responsibilities, programs, activities, politics, and funding sources as well as offering a review of the overall process. Written by Penelepe C. Hunt, a successful practitioner of and noted expert in academic fundraising, the book includes information on attracting and retaining effective development officers and contains suggestions for deans (and other campus leaders) for working effectively with these valued members of their institutions. Hunt introduces novice fundraisers to the cycle of giving (identification, qualification, cultivation, solicitation, and stewardship) and provides information on how and when to take part in the fundraising process. She defines the various types of funding including annual gifts, major gifts, planned gifts, and principal gifts and reveals why ascertaining which type of gift will be most appealing to a donor is an important part of planning for a successful solicitation. Development for Academic Leaders also contains suggestions for overcoming reluctance on the part of leaders to ask potential donors for a gift. Hunt explains that donors do not give merely because our programs need and deserve support. They give because of their own desires, passions, and aspirations. Development for Academic Leaders also reveals the importance of participating in your institution's overall development

communications efforts and offers a general overview of campaign and event principles and how you can use these funding strategies to the advantage of your college. For any academic leader who participates in their program's fundraising efforts, this important resource offers a wealth of information for becoming a creative, skilled, and successful part of the fundraising team.

National planning policy framework 2012 Jun 19 2021 The National Planning Policy Framework 2012 sets out the Government's planning policies for England in achieving sustainable development and how these are expected to be applied. It sets out the requirements for the planning system only to the extent that it is relevant, proportionate and necessary to do so. It provides a framework within which local people and their accountable councils can produce their own distinctive local and neighbourhood plans, which reflect the needs and priorities of their communities. This Framework does not contain specific policies for nationally significant projects for which particular considerations apply. Divided into thirteen chapters, with three annexes, it looks at the following areas, including: building a competitive economy; ensuring town centre vitality; supporting a high quality communications infrastructure; delivering high quality homes; protecting the Green Belt; meeting the challenges of climate change, flooding and coastal change; conserving the natural and historic environments and facilitating the sustainable use of minerals.

Dualisation of Part-Time Work Aug 10 2020 This book brings together leading international authors from a number of fields to provide an up to date understanding of part-time work at national, sector, industry and workplace levels. The contributors critically examine part-time employment in different institutional settings across Europe, the USA, Australia and Korea. This analysis serves as a prism to investigate wider trends, particularly in female employment, including the continued increase in part-time work and processes that are increasingly creating dualization and inequality between 'good' and 'bad' jobs.
