Presenting America's World May 31 2022 National Geographic magazine is probably the most visible and popular expression of geography in the USA. Presenting America's World presents a critical analysis of the world portrayed by National Geographic, from its formative years in the nineteenth century, through to 1945. It situates the National Geographic Society's development within the context of a new American overseas expansionism, interrogates the magazine as America's ubiquitous source of wholesome exotica and erotica, examines the ways in which it framed the world for its millions of readers, and questions its participation in the cultural work of US global hegemony. The book argues that National Geographic successfully employed 'strategies of innocence', a contradictory stance of representation which simultaneously asserts innocence - either the innocence of 'just watching' or the innocence of altruistic behaviour - while naturalizing Western hegemony. Presenting America's World not only considers the world that National Geographic presented to its readers, but also examines the magazine's own institutional world of writers, photographers and editors. Particular attention is paid to Gilbert H. Grosvenor, the magazine's editor for over 50 years, Maynard Owen Williams, a writer and photographer who worked on nearly 100 articles from 1919 to 1960 and Harriet Chalmers Adams, a freelancer, explorer and Pan-American activist who contributed 21 articles.

[Confronting Leviathan](#) Aug 10 2020 'Bracingly intelligent ... a wonderful read' Guardian 'Incredibly timely ... presented [with] wonderful elegance and clarity' Irish Times Based on the History Of Ideas podcast series by Talking Politics host David Runciman, Confronting Leviathan explores some of the most important thinkers and prominent ideas lying behind modern politics - from Hobbes to Gandhi, from democracy to patriarchy, and from revolution to lock down. While explaining the most important and often-cited ideas of thinkers such as Constant, De Tocqueville, Marx and Engels, Hayek, MacKinnon and Fukuyama, David Runciman shows how crises - revolutions, wars, depressions, pandemics - generated these new ways of political thinking. This is a history of ideas to help make sense of what's happening today.

[The Complete Book of Seminole Patchwork](#) Aug 29 2019 Fascinating introduction to a unique form of needlecraft distinguished by bright horizontal patterns and created by sewing, cutting, and rearranging strips of multicolored bands. Simply written, profusely illustrated volume includes a glossary of important terms and displays varied patchwork patterns along with instructions for reading assembly diagrams.

[Against the Gates of Hell](#) Feb 02 2020 A riveting story of one man's life and ministry during the explosion of Christian missions in nineteenth-century America, Against the Gates of Hell is the biography of Henry T. Perry, a missionary to Turkey from 1866 to 1913. Based heavily on previously unpublished letters and diaries from the ABCFM (American Board of Commissioners of Foreign Missions) archives in Harvard's Houghton Library, Against the Gates of Hell provides an eyewitness account of the last years of the Ottoman Empire, years that are the foundation for the modern Middle East. Perry's diary also reveals a life wholly committed to Christ, by his example challenging the reader in his own Christian walk. Here too can be found historical testimonies of Muslim/Christian relations which have assumed renewed importance since the events of September 11, 2001. Against the Gates of Hell is classic

narrative history, carefully researched, attentive to human interest detail, and contextually rich in historical background. Because of the richness of the historical background, the work becomes a cultural history as well as a biography. The book includes firsthand, eyewitness accounts of the 1894-1895 Armenian massacres and the 1915 Armenian genocide. *Against the Gates of Hell* is especially timely for the 100th anniversary in 2015 of the 1915 Armenian Genocide, the first genocide of the twentieth century.

Arctic Mirage Apr 17 2021 In 1913, an expedition was sent to the Arctic, funded by the American Museum of Natural History, the American Geographical Society and the University of Illinois. Its purpose was twofold: to discover whether an archipelago called Crocker Land--reportedly spotted by an earlier explorer in 1906--actually existed; and to engage in scientific research in the Arctic. When explorers discovered that Crocker Land did not exist, they instead pursued their research, made a number of important discoveries and documented the region's indigenous inhabitants and natural habitat. Their return to America was delayed by the difficulty of engaging a relief ship, and by the danger of German submarines in Arctic waters during the World War I.

Icy Winters on the Chesapeake Bay: A History Mar 05 2020 Sailing on the Chesapeake Bay's myriad inlets in summer, it is hard to imagine that come January icebreakers might be plowing the waters you cruised in July. When portions of the Great Shellfish Bay are iced up the flow of commerce is impeded. At the turn of the 19th century, with the center of the new nation's government established in its arms, a frozen Bay meant that the United States' emergence to a status on par with the foremost nations of the world might be painfully slow. Throughout the 20th century years of extreme cold continued to halt navigation and fishing. James Foster chronicles the disasters, large and small, which come with the coldest of winters.

All Over the Map Apr 29 2022 Created for map lovers by map lovers, this rich book explores the intriguing stories behind maps across history and illuminates how the art of cartography thrives today. In this visually stunning book, award-winning journalists Betsy Mason and Greg Miller--authors of the National Geographic cartography blog "All Over the Map"--explore the intriguing stories behind maps from a wide variety of cultures, civilizations, and time periods. Based on interviews with scores of leading cartographers, curators, historians, and scholars, this is a remarkable selection of fascinating and unusual maps. This diverse compendium includes ancient maps of dragon-filled seas, elaborate graphics picturing unseen concepts and forces from inside Earth to outer space, devious maps created by spies, and maps from pop culture such as the schematics to the Death Star and a map of Westeros from Game of Thrones. If your brain craves maps--and Mason and Miller would say it does, whether you know it or not--this eye-opening visual feast will inspire and delight.

The Silk Road Oct 31 2019 "Evocative and enigmatic, the Silk Road occupies a unique place in contemporary culture and international affairs. Across the world, it has captured the imagination as a story of camel caravans crossing desert and mountain, of precious goods moving between East and West, and of ideas, religions and technologies migrating across land and sea. As China seeks to "revive" the Silk Roads for the twenty-first century, this compelling, yet poorly understood, narrative of history now serves as a platform for building trade, diplomatic, infrastructure and geopolitical connections. "The Silk Road: Connecting Histories and Futures" is the first book to critically investigate the merits and problems of this fabled geocultural narrative of history, and map out the role it plays in international affairs. Four thematic sections trace its rise to global fame as a domain of scholarship and foreign policy, a celebration of peace and internationalism, and how it created dreams of exploration and grand adventure. China's Health Silk Road and civilizational politics are among the themes discussed that open up the Silk Roads as a space for critical enquiry"--

Women Nov 05 2022 This powerful photography collection, drawn from the celebrated National Geographic archive, reveals the lives of women from around the globe, accompanied by revelatory new interviews and portraits of contemporary trailblazers including Oprah Winfrey, Jane Goodall, and Christiane Amanpour. #MeToo. #GirlBoss. Time's Up. From Silicon Valley to politics and beyond, women are reshaping our world. Now, in anticipation of the 100th anniversary of the 19th amendment, this bold and inspiring book from National Geographic mines 130 years of photography to showcase their past, their present, and their future. With 300+ stunning images from more than 50 countries, each page of this glorious book offers compelling testimony about what it means to be female, from historic suffragettes to the haunting, green-eyed "Afghan girl." Organized around chapter themes like grit, love, and joy, the book features brand-new commentary from a wide swath of luminaries including Laura Bush, Gloria Allred, Roxane Gay, Melinda Gates, New Zealand prime minister Jacinda Ardern, and the founders of the #MeToo and Black Lives Matter movements. Each is accompanied by a bold new portrait, shot by acclaimed NG photographer Erika Larsen. The ultimate coffee table book, this iconic collection provides definitive proof that the future is female.

American Orientalism Jul 09 2020 Douglas Little explores the stormy American relationship with the Middle East from World War II through the war in Iraq, focusing particularly on the complex and often inconsistent attitudes and interests that helped put the United States on a collision course with radical Islam early in the new millennium. After documenting the persistence of "orientalist" stereotypes in American popular culture, Little examines oil, Israel, and other aspects of U.S. policy. He concludes that a peculiar blend of arrogance and ignorance has led American officials to overestimate their ability to shape events in the Middle East from 1945 through the present day, and that it has been a driving force behind the Iraq war. For this updated third edition, Little covers events through 2007, including a new chapter on the Bush Doctrine, demonstrating that in many important ways, George W. Bush's Middle Eastern policies mark a sharp break with the past.

United States Army Depot Brigades in World War I Jul 21 2021 Much has been written about the exploits of the American Expeditionary Forces, the men and women sent overseas to fight during World War I, but much less is known about the two million who served in the Army without ever setting foot on foreign soil. This book examines the history of depot brigades, development battalions, U.S. Guards units, Students' Army Training Corps, and other "forgotten" troops charged with training soldiers, guarding installations, and performing myriad other duties. It also chronicles the service of men like actor Jimmy Cagney, author F. Scott Fitzgerald, movie director Frank Capra, children's author Ludwig Bemelmans, and the two million others who served in the United States during the war. At the time, many of these men considered themselves unfortunate cast-offs, doomed to spend the war safe at home while their friends served in combat overseas. But, in the end, it was largely because of them that America could field an effective fighting force.

Hold Your Water Dec 02 2019 Hold Your Water offers insight into the water and world around us. Taking a conversational approach to conservation, it dives into simple ways that even little old you can make a difference--all with a witty, and at times whimsical, slant on the world in which we live. The Wyland Foundation is widely lauded by politicians and scientists alike for its practical insight and positive impact on our planet. Former Vice President Al Gore praised the group, saying, "Your organization makes an invaluable contribution to the effort to promote environmental awareness." Hold Your Water is the latest in the organization's legacy of arming everyday people with straight-ahead insight and simple tips for keeping our planet blue. Written by two members of Wyland's staff, the book provides countless fascinating facts about our planet. For instance, did you realize that while two-thirds of the earth's surface is covered by water, only 3 percent of that water is safe to drink? And of that 3 percent, nearly two-thirds is locked up in polar ice caps? The book offers easy ways for people to help preserve water and other related precious resources. Divided into more than 30 sections, this compendium illustrates how everyday activities such as car washing, showering, fertilizing--even 'pet poop' cleanup--can negatively impact the environment. It then delivers more than 100 tips and tidbits that will help you protect your planet. Whether you are one of the nearly three-quarters of Americans who consider themselves environmentalists, or you just want to know more about the world in which you live, Hold Your Water is a book worth holding on to.

War on Our Doorstep Jul 29 2019 In June 1942, Japanese troops occupied the Aleutian islands of Attu and Kiska in Alaska, the first enemy occupation of US territory since the War of 1812. For the next year a bloody conflict raged that was nearly invisible to most North Americans as Canadian and American soldiers, airmen and sailors went north to hold the Japanese in check. This is the complete story of the war in the North Pacific, including details of: Japanese subs lurking off the west coast, sinking ships and shelling the coast of British Columbia; the submarine-launched airplane that bombed Oregon's forests; the surreal tale of balloon-bombs crossing the Pacific to North America. Brendan Coyle has done a magnificent job in this comprehensive review of the war on the West Coast. No other single volume has so neatly tied together the myriad stories of how the war affected people in British Columbia, California, Oregon, Washington, and Alaska. —Jim Delgado
