Assessing the state of the rice milling sector in Nigeria: The role of policy for growth and modernization Jul 09 2020 We use an industry profit maximization model to conduct an ex-post impact assessment on the extent the rice milling sector in Nigeria has grown and improved its performance in producing high quality premium rice following major public sector interventions made under the Agricultural Transformation Agenda. Given challenges with the availability and qual-ity of data, this assessment looks at the changes between two periods, 2009 and 2013, and simulates the performance of the sector under different technology capacities and policy scenarios. We find that the government has been success-ful in expanding quality paddy production and milling capacity in the country along with an increase in capacity utilization in the medium and large-scale milling sub-sectors. As a result, the production of premium quality rice has increased by approximately 0.5 million metric tons between the two periods. Despite these gains, the industry did not see any overall increase in employment in the medium and large-scale sub-sectors. Further focus by the government on expanding the supply of high quality rice paddy, while maintaining high tariffs to keep the medium and large scale milling sector viable, may provide the best opportunity for Nigeria to reach its goal of self-sufficiency in rice production.

Progress of the World's Women 2015-2016 Oct 31 2019 This UN Women's flagship report shows that, all too often, women's economic and social rights are held back, because they are forced to fit into a 'man's world'. But, it is possible to move beyond the status quo, to picture a world where economies are built with women's rights at their heart. It is being published as the international community comes together to define a transformative post-2015 development agenda, and coincides with the 20th anniversary commemoration of the landmark Fourth World Conference on Women in Beijing, China which set out a comprehensive agenda to advance gender equality. This publication brings together human rights and economic policymaking, and provides the key elements for a far-reaching new policy agenda that can transform economies and make women's rights a reality. Through solid in-depth analysis and data, this evidence-based report provides key recommendations on moving towards an economy that truly works for women, for the benefit of all.

When the State Winks Jan 15 2021 Religious conversion is often associated with ideals of religious sincerity. But in a society in which religious belonging is entangled with ethnonational citizenship and confers political privilege, a convert might well have multilayered motives. Over the last two decades, mass non-Jewish immigration to Israel, especially from the former Soviet Union, has sparked heated debates over the Jewish state's conversion policy and intensified suspicion of converts' sincerity. When the State Winks carefully traces the performance of state-endorsed Orthodox conversion to highlight the collaborative labor that goes into the making of the Israeli state and its Jewish citizens. In a rich ethnographic narrative based on fieldwork in conversion schools, rabbinic courts, and ritual bathhouses, Michal Kravel-Tovi follows conversion candidates—mostly secular young women from a former Soviet background—and state conversion agents, mostly religious Zionists caught between the contradictory demands of their nationalist and religious commitments. She complicates the popular perception that conversion is a “wink-wink” relationship in which both sides agree to treat the converts' pretenses of observance as real. Instead, she demonstrates how their interdependent performances blur any clear boundary between sincere and empty conversions. Alongside detailed ethnography, When the State Winks develops new ways to think about the complex connection between religious conversion and the nation-state. Kravel-Tovi emphasizes how state power and morality is managed through “winking”—the subtle exchanges and performances that animate everyday institutional encounters between state and citizen. In a country marked by tension between official religiosity and a predominantly secular Jewish population, winking permits the state to save its Jewish face.

Evolution of International Aviation Jan 03 2020 As with the previous two editions, *Evolution of International Aviation* reviews the historical development of the international aviation system. From this foundation it then provides an updated and expanded account of the current state of the aviation and aerospace industry including profitability, consolidation, and merger activity. New to this edition, the book broadens the coverage of the industry segments - airlines, air cargo, and manufacturing - to include the emerging commercial space sector. Because this book is intended for both the interested amateur and the more serious student, references are provided in the text and at the end of each chapter to allow for further in-depth study. The third edition also adds to each chapter a set of learning objectives and a concluding series of questions for discussion.

The Routledge Handbook of Urbanization and Global Environmental Change Aug 02 2022 This volume provides a comprehensive overview of the interactions and feedbacks between urbanization and global environmental change. A key focus is the examination of how urbanization influences global environmental change, and how global environmental change in turn influences urbanization processes. It has four thematic foci: Theme 1 addresses the pathways through which urbanization drives global environmental change. Theme 2 addresses the pathways through which global environmental change affects the urban system. Theme 3 addresses the interactions and responses within the urban system in response to global environmental change. Theme 4 centers on critical emerging research.

International Mobility, Global Capitalism, and Changing Structures of Accumulation Jul 21 2021 International mobility is not a new concept as people have moved throughout history, voluntarily and forcibly, for personal, familial, economic, political, and professional reasons. Yet, the mobility of technical talent in the global economy is relatively new, largely voluntary, structurally determined by market forces, and influenced by immigration policies. With over a decade's worth of extensive research in India, Japan, Finland, and Singapore, this book provides an alternative understanding of how capitalism functions at the global level by specifically analyzing the international movement of technical professionals between India and Japan. There are three factors that inform this study: the services transition away from manufacturing, the movement of technical professionals in the world economy, and the demographic crisis facing Japan. The dynamics of changing capitalism are examined by theorizing the emergence of the services sector in the USA and Japan, analyzing the pronounced social inequality in India that is the basis for the global supply of highly skilled technical professionals, and providing considerable empirical data on the flows of professionals to these two countries to indicate Japan's institutional inflexibility in accommodating foreign talent. The author anticipates that Japanese industry will shed some of its institutional rigidity due to the pressures of competition and the scarcity of technical professionals. Providing a wealth of information on the topic of international mobility, this book is an essential addition for scholars and students in the field of International Development, Business Studies, Asian Studies, Migration Studies, and Political Economy.

The Soul of Judaism Apr 29 2022 Explores the full diversity of Black Jews, including bi-racial Jews of both matrilineal and patrilineal descent; adoptees; black converts to Judaism; and Black Hebrews and Israelites, who trace their Jewish roots to Africa and challenge the dominant western paradigm of Jews as white and of European descent. The book showcases the lives of Black Jews, demonstrating that racial ascription has been shaping Jewish selfhood for centuries. It reassesses the boundaries between race and ethnicity, offering insight into how ethnicity can be understood only in relation to racialization and the one-drop rule. Within this context, Black Jewish individuals strive to assert their dual identities and find acceptance within their communities. Putting to rest the notion that Jews are white and the Black Jews are therefore a contradiction, the volume argues that we cannot pigeonhole Black Hebrews and Israelites as exotic, militant, and nationalistic sects outside the boundaries of mainstream Jewish thought and community life. It spurs us to consider the significance of the growing population of self-identified Black Jews and its implications for the future of American Jewry.

Pulses and their by-products as animal feed Aug 29 2019 Pulses provide valuable products for animal feeding and thereby indirectly contribute to food security. In order to promote the use of pulses and their by-products in regions where they are often wasted, this publication highlights the nutritional role of beans, vetches, lentils and peas for different animal breeds and looks at the necessary climatic conditions for cultivation.

Social and economic performance of tilapia farming in Brazil Feb 02 2020 Tilapia is the most popular aquaculture species item farmed in over 120 countries or territories worldwide. Global tilapia aquaculture production grew 11 percent annually (or 13 percent in terms of farmgate value) over the past three decades, from 0.3 million tonnes (USD 304 million) in 1987 to 5.9 million tonnes (USD 11 billion) in 2017. Aquaculture production in Brazil increased 14 percent annually (or 12 percent in terms of farmgate value), from 13 000 tonnes (USD 56 million) in 1987 to 595 000 tonnes (USD 1.5 billion) in 2017, making it a regional aquaculture powerhouse contributing to 20 percent of Latin America and the Caribbean's aquaculture production in 2017. In Brazil, tilapia has been the largest aquaculture item, contributing to nearly half of the country's aquaculture production tonnage in 2017. This document assesses tilapia farming and the value chain in Brazil by examining tilapia farming technology and practices, dissecting the tilapia value chain, evaluating the sector's social and economic performance, discussing the importance of proper governance to the sector development, and highlighting potentials, issues, constraints and challenges in the development of tilapia farming or aquaculture in general in Brazil.

Progress, Challenges, and Opportunities for Converting U.S. and Russian Research Reactors Feb 25 2022 Highly enriched uranium (HEU) is used for two major civilian purposes: as fuel for research reactors and as targets for medical isotope production. This material can be dangerous in the wrong hands. Stolen or diverted HEU can be used-in conjunction with some knowledge of physics-to build nuclear explosive devices. Thus, the continued civilian use of HEU is of concern particularly because this material may not be uniformly well-protected. To address these concerns, the National Research Council (NRC) of the U.S. National Academies and the Russian Academy of Sciences (RAS) held a joint symposium on June 8-10, 2011. Progress, Challenges, and Opportunities for Converting U.S. and Russian Research Reactors summarizes the proceedings of this joint symposium. This report addresses: (1) recent progress on conversion of research reactors, with a focus on U.S.- and R.F.-

origin reactors; (2) lessons learned for overcoming conversion challenges, increasing the effectiveness of research reactor use, and enabling new reactor missions; (3) future research reactor conversion plans, challenges, and opportunities; and (4) actions that could be taken by U.S. and Russian organizations to promote conversion. The agenda for the symposium is provided in Appendix A, biographical sketches of the committee members are provided in Appendix B, and the report concludes with the statement of task in Appendix C.

Changing Trends in China's Inequality Mar 05 2020 Over the past quarter-century China has seen a dramatic increase in income inequality, prompting a shift in China's development strategy and the adoption of an array of new policies to redistribute income, promote shared growth, and establish a social safety net. Drawing on of household-level data from the China Household Income Project, *Changing Trends in China's Inequality* provides an independent, comprehensive, and empirically grounded study of the evolution of incomes and inequality in China over time. Edited by leading experts on the Chinese economy, the volume analyzes this evolution in China as a whole as well as in the urban and rural sectors, with close attention to measurement issues and to shifts in the economy, institutions, and public policy. Specific essays provides analyses of China's wealth inequality, the emergence of a new middle class, the income gap between the Han majority and the ethnic minorities, the gender wage gap, and the impacts of government policies such as social welfare programs and the minimum wage.

2012 Estate Planning May 07 2020 2012 may be the most important year in history for tax planning. More wealth may be transferred in the waning months of 2012 than any other year. What can and should you do to take advantage of the potentially astounding planning opportunities that are available? What are the risks associated with this planning and how can you minimize those risks? With much of the planning so complicated how can you make decisions as to which of various alternatives are best fore you? Three of the nation's leading tax experts have addressed all these critical issues and so much more in this timely and authoritative book. This book is written to be accessible to sophisticated taxpayers who can personally benefit from this planning. But because of the broad coverage of even esoteric topics, some discussions are a bit tough. This book will also prove an invaluable resource for CPAs, financial planners, insurance consultants, and attorneys. The supplemental appendices for professional advisers with practical forms, sample legal provisions, and client letters practitioners can use will all prove a useful resource making this book a must read for professionals.

Advancements in Biomass Feedstock Preprocessing: Conversion Ready Feedstocks Dec 26 2021 The success of lignocellulosic biofuels and biochemical industries depends upon an economic and reliable supply of quality biomass. However, research and development efforts have historically focused on the utilization of agriculturally-derived, cellulosic feedstocks without consideration of their low energy density, high variations in physical and chemical characteristics and potential supply risks in terms of availability and affordability. This Research Topic will explore strategies that enable supply chain improvements in biomass quality and consistency through blending, preprocessing, diversity and landscape design for development of conversion-ready, lignocellulosic feedstocks for production of biofuels and bio-products. Biomass

variability has proven a formidable challenge to the emerging biorefining industry, impeding continuous operation and reducing yields required for economical production of lignocellulosic biofuels at scale. Conventional supply systems lack the preprocessing capabilities necessary to ensure consistent biomass feedstocks with physical and chemical properties that are compatible with supply chain operations and conversion processes. Direct coupling of conventional feedstock supply systems with sophisticated conversion systems has reduced the operability of biorefining processes to less than 50%. As the bioeconomy grows, the inherent variability of biomass resources cannot be managed by passive means alone. As such, there is a need to fully recognize the magnitude of biomass variability and uncertainty, as well as the cost of failing to design feedstock supply systems that can mitigate biomass variability and uncertainty. A paradigm shift is needed, from biorefinery designs using raw, single-resource biomass, to advanced feedstock supply systems that harness diverse biomass resources to enable supply chain resilience and development of conversion-ready feedstocks. Blending and preprocessing (e.g., drying, sorting, sizing, fractionation, leaching, densification, etc.) can mitigate variable quality and performance in diverse resources when integrated with downstream conversion systems. Decoupling feedstock supply from biorefining provides an opportunity to manage supply risks and incorporate value-added upgrading to develop feedstocks with improved convertibility and/ or market fungibility. Conversion-ready feedstocks have undergone the required preprocessing to ensure compatibility with conversion and utilization prior to delivery at the biorefinery and represent lignocellulosic biomass with physical and chemical properties that are tailored to meet the requirements of industrially-relevant handling and conversion systems.

The Impact of Tourist Activities on Low-Density Territories Aug 22 2021 This book tackles the question of how tourism development and suitable policies can be used to promote sustainable development in Low-Density Territories (LDTs). The respective chapters, written by prominent experts, identify the problems associated with LDTs; highlight the comparative advantages of these territories with regard to tourism; propose methodologies for assessing the impact of tourism; and present case studies on the application of sustainable policies in tourism. Given its scope, it will be especially interesting for academics and researchers investigating LDTs and sustainable tourism, and for policymakers interested in developing these territories. LDTs represent an economic challenge, especially because most of them are home to an increasingly ageing population unable to pursue economic development. In these territories, tourism is emerging as an excellent opportunity to promote innovative dynamics, to lure investment, and to attract new people. However, it is important to promote sustainable tourism, which preserves the environment and communities' quality of life. The Chapter "Tourism, immigrants and lifestyle entrepreneurship: The (In)coming of people as a key factor for sustainability of low-density territories – A case study in Portugal" is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com.

Convert Every Click Sep 22 2021 A holistic approach to conversion rate optimization that encompasses an entire business—online and offline—to drive more sales and referrals, and increase bottom-line profits In order for your business to survive, you must convert anonymous traffic into sales. The better you do that, the more money you make. The science of tweaking and testing webpages to convert the maximum number of people is known as conversion rate optimization (CRO). *Convert Every Click* introduces an expanded vision of CRO that the author, Benji Rabhan, calls "holistic conversion rate optimization." Internet technology and innovation have changed the way you should be optimizing your business, your marketing, and your websites. The book looks at the psychology behind this new way of optimizing an entire business for more profits. It examines how your website plays a role in your overall business strategy, and details how to use CRO psychology and strategies to increase profits. Teaches proven strategies for increasing conversions across your entire business Details various split testing and data gathering methods and when to use each one Unveils a holistic approach to conversion rate optimization, using technology to create a more customer-centric experience that not only increases conversions, but also improves customer engagement and satisfaction With guidance from *Convert Every Click*, you'll learn how to boost conversions and consumption across your entire business by maximizing every bit of your hard-earned traffic before, during, and after a sale.

Teen Lives around the World: A Global Encyclopedia [2 volumes] Sep 03 2022 This two-volume encyclopedia looks at the lives of teenagers around the world, examining topics from a typical school day to major issues that teens face today, including bullying, violence, sexuality, and social and financial pressures. • Gives readers a glimpse into a typical day in the life of a teen in countries around the world, from wake up time to classes to after school activities • Focuses on interesting facts and anecdotal information • Allows students to make cross-national comparisons of topics such as literacy, education, rights, internet use, and other key issues • Shows a complex picture of new family forms, new gender roles, and declining religious belief with the strong persistence of conservative values

Impact Investment Jan 27 2022 Apply a rigorous investment process and integrate social impact analyses to successfully select and invest in social impact investments *Impact Investment: A Practical Guide to Investment Process and Social Impact Analysis* is a must-read guide for investors and wealth managers entering the social finance investment space known as "impact investing." This book walks readers through the demanding task of properly executing an impact investment strategy, providing solutions to some of the most vexing challenges that arise when investing for both financial return and social impact. Readers will learn how impact investing is different from other strategies, how the organization's mission affects investment decisions and structures, and what to look for in an organization prior to investing. A running example of a village distribution company illustrates the methods and concepts in action, and a full-fledged case study utilizing downloadable professional level analytical tools consolidates all examples into a real-world setting. Impact investing is generating significant momentum, but many individuals operating in this space come from alternative backgrounds and lack the knowledge to form a rigorous investment process. Disparate funding sources, immature markets, variations in fund economics, and the need to generate and report social impact all complicate the industry even further, creating a barrier for curious investors. This book is a guide to applying standard investment processes and social impact analyses to impact investing, helping readers: Adjust standard analysis techniques to suit the particularities of impact investing Discover how social mission influences the entire investment from entry to exit Plan and execute a robust custom impact investment strategy Understand social impact entities and the management of impact investments Investing with the goal of social impact doesn't remove the need for rigorous investment techniques and diligent processes. *Impact Investment: A Practical Guide to Investment Process and Social Impact Analysis* is a guide to putting it all together, for a more targeted approach to impact investing.

The Budget of the United States Government Jun 27 2019

Fiscal Monitor, October 2018 Oct 24 2021 Public sector balance sheets provide the most comprehensive picture of public wealth. They bring together all the accumulated assets and liabilities that the government controls, including public corporations, natural resources, and pension liabilities. They thus account for the entirety of what the state owns and owes, offering a broader fiscal picture beyond debt and deficits. Most governments do not provide such transparency, thereby avoiding the additional scrutiny it brings. Better balance sheet management enables countries to increase revenues, reduce risks, and improve fiscal policymaking. There is some empirical evidence that financial markets are increasingly paying attention to the entire government balance sheet and that strong balance sheets enhance economic resilience. This issue of the *Fiscal Monitor* presents a new database that shows comprehensive estimates of public sector assets and liabilities for a broad sample of 31 countries, covering 61 percent of the global economy, and provides tools to analyze and manage public wealth. Estimates of public wealth reveal the full scale of public assets and liabilities. Assets are worth US\$101 trillion or 219 percent of GDP in the sample. This includes 120 percent of

GDP in public corporation assets. Also included are natural resources that average 110 percent of GDP among the large natural-resource-producing countries. Recognizing these assets does not negate the vulnerabilities associated with the standard measure of general government public debt, comprising 94 percent of GDP for these countries. This is only half of total public sector liabilities of 198 percent of GDP, which also includes 46 percent of GDP in already accrued pension liabilities. Once governments understand the size and nature of public assets, they can start managing them more effectively. Potential gains from better asset management are considerable. Revenue gains from nonfinancial public corporations and government financial assets alone could be as high as 3 percent of GDP a year, equivalent to annual corporate tax collections across advanced economies. In addition, considerable gains could be realized from government nonfinancial assets. Public assets are a significant resource, and how governments use and report on them matters, not just for financial reasons, but also in terms of improving service delivery and preventing the misuse of resources that often results from a lack of transparency.
