**Narrow-gap II-VI Compounds for Optoelectronic and Electromagnetic Applications** Sep 17 2021 The field of narrow-gap II-VI materials is dominated by the compound mercury cadmium telluride, MCT or  $\text{Hg}_{1-x}\text{Cd}_x\text{Te}$ . By varying the  $x$  value, material can be made to cover all the important infrared (IR) ranges of interest. It is probably true to say that MCT is the third most studied semiconductor after silicon and gallium arsenide. As current epitaxial layers of MCT are mainly grown on bulk CdTe family substrates these materials are included in this book, although strictly, of course, they are not 'narrow-gap'. This book is intended for readers who are either new to the field or are experienced workers in the field who need a comprehensive and up to date view of this rapidly expanding area. To satisfy the needs of the first group each chapter discusses the principles underlying each topic and some of the historical background before bringing the reader the most recent information available. For those currently in the field the book can be used as a collection of useful data, as a guide to the literature and as an overview of topics covering the wide range of work areas.

**A Scientific Bibliography of the Drakensberg, Maloti and Adjacent Lowlands** Jan 10 2021 This bibliography includes scientific articles on the Drakensberg, Maloti and Adjacent Lowlands published between 1808 and 2019. Although focussing on material appearing in accredited journals, there is such a wealth of information in the form of unpublished, yet traceable, reports, documents, presentations and dissertations, these are also included. The bibliography has two parts – a complete list arranged alphabetically, and the same references arranged in 33 different disciplines. These range from Palaeobotany with 17 entries, to Rock Art with 502 entries.

**Fuzzy Systems: Concepts, Methodologies, Tools, and Applications** Nov 07 2020 There are a myriad of mathematical problems that cannot be solved using traditional methods. The development of fuzzy expert systems has provided new opportunities for problem-solving amidst uncertainties. Fuzzy Systems: Concepts, Methodologies, Tools, and Applications is a comprehensive reference source on the latest scholarly research and developments in fuzzy rule-based methods and examines both theoretical foundations and real-world utilization of these logic sets. Featuring a range of extensive coverage across innovative topics, such as fuzzy logic, rule-based systems, and fuzzy analysis, this is an essential publication for scientists, doctors, engineers, physicians, and researchers interested in emerging perspectives and uses of fuzzy systems in various sectors.

*Nanocomposites, Nanostructures, and Their Applications* Jul 24 2019 This book highlights some of the latest advances in nanotechnology and nanomaterials from leading researchers in Ukraine, Europe, and beyond. It features contributions from participants in the 6th International Science and Practice Conference Nanotechnology and Nanomaterials (NANO2018) in Kiev, Ukraine on August 27-30, 2018 organized by the Institute of Physics of the National Academy of Sciences of Ukraine, University of Tartu (Estonia), University of Turin (Italy), and Pierre and Marie Curie University (France). Internationally recognized experts from a wide range of universities and research institutions share their knowledge and key results on material properties, behavior, and synthesis. This book's companion volume also addresses topics such as nanooptics, energy storage, and biomedical applications.

**Computational Science and Its Applications – ICCSA 2020** Jul 04 2020 The seven volumes LNCS 12249-12255 constitute the refereed proceedings of the 20th International Conference on Computational Science and Its Applications, ICCSA 2020, held in Cagliari, Italy, in July 2020. Due to COVID-19 pandemic the conference was organized in an online event. Computational Science is the main pillar of most of the present research, industrial and commercial applications, and plays a unique role in exploiting ICT innovative technologies. The 466 full papers and 32 short papers presented were carefully reviewed and selected from 1450 submissions. Apart from the general track, ICCSA 2020 also include 52 workshops, in various areas of computational sciences, ranging from computational science technologies, to specific areas of computational sciences, such as software engineering, security, machine learning and artificial intelligence, blockchain technologies, and of applications in many fields.

Fisheries Management Oct 19 2021 The world's stocks of wild fish continue to decline, making the task of finding innovative, sustainable and socially acceptable methods of fisheries management more important than ever. Several new approaches from around the world have proved to be successful in stemming the decline whilst increasing fish catches, and under the editorship of McClanahan and Castilla this international team of authors have looked to these examples to provide the reader with carefully chosen case studies offering practical suggestions and solutions for problem fisheries elsewhere. Coverage includes: Community based fisheries Collaborative and co-operative fisheries management Coastal fisheries management The future for sustainable fisheries management Written by many of the world's most experienced practitioners Fisheries Management: Progress toward sustainability is an important purchase for all fisheries scientists, managers and conservationists. All libraries in universities and research establishments where this area is studied and taught will find this book a valuable addition to their shelves.

**The Palgrave Handbook of Blue Heritage** Sep 05 2020 This handbook is unique in its consideration of social and cultural contributions to sustainable oceans management. It is also unique in its deconstruction of the hegemonic value attached to the oceans and in its analysis of discourses regarding what national governments in the Global South should prioritise in their oceans management strategy. Offering a historical perspective from the start, the handbook reflects on the confluence of (western) scientific discourse and colonialism, and the impact of this on indigenous conceptions of the oceans and on social identity. With regard to the latter, the authors are mindful of the nationalisation of island territories worldwide and the impact of this process on regional collaboration, cultural exchange and the valuation of the oceans. Focusing on global examples, the handbook offers a nuanced, region relevant, contemporary conceptualisation of blue heritage, discussing what will be required to achieve an inclusive oceans economy by 2063, the end goal date of the African Union's Agenda 2063. The analysis will be useful to established academics in the field of ocean studies, policymakers and practitioners engaged in research on the ocean economy, as well as graduate scholars in the ocean sciences.

**Nature Tourism, Conservation, and Development in Kwazulu-Natal, South Africa** May 14 2021 This publication considers environmental, social and economic issues concerning the development of nature tourism. Using KwaZulu-Natal in South Africa as a case study, it highlights the benefits and trade-offs in promoting and managing sustainable nature tourism development, and examines how to promote the objectives of economic growth, poverty reduction and conservation. Three key issues are explored: the need to move beyond development of a wildlife industry to the creation of a true nature tourism economy that supports biodiversity; the role of the private sector in achieving equitable development and job creation while generating conservation finance; and alternative pricing and other market mechanisms to encourage the growth and economic viability of nature tourism.

**The Arts and Indigenous Knowledge Systems in a Modernized Africa** Dec 09 2020 This collection derives from a conference held in Pretoria, South Africa, and discusses issues of indigenous knowledge systems (IKS) and the arts. It presents ideas about how to promote a deeper understanding of IKS within the arts, the development of IKS-arts research methodologies, and the protection and promotion of IKS in the arts. Knowledge, embedded in song, dance, folklore, design, architecture, theatre, and attire, and the visual arts can promote innovation and entrepreneurship, and it can improve communication. IKS, however, exists in a post-millennium, modernizing Africa. It is then the concept of post-Africanism that would induce one to think along the lines of a globalized, cosmopolitan and essentially modernized Africa. The book captures leading trends and ideas that could help to protect, promote, develop and affirm indigenous knowledge and systems, whilst also making room for ideas that do not necessarily oppose IKS, but encourage the modernization (not Westernization) of Africa.

**Circulation Weather types as a tool in atmospheric, climate and environmental research** Mar 31 2020 Classifications of circulation weather systems have a long history in meteorology and climatology. Starting with manual classifications over specific regions of the globe, these tools (generally called “catalogs of synoptic types”) were restricted mainly to weather forecasting and historical climate variability studies. In the last decades, the advance of computing resources and the availability of datasets have fostered the development of fast and objective methods that process large amount of data. In recent years numerous methods of circulation type classification have been designed, showing their usefulness on a wide range of applications in scientific domains related to weather, climate, and environment. This Research Topic highlights methodological advances in circulation weather types and also their applications to different research areas. The articles included in this research topic show that circulation weather types can be used not only in Europe, where they have been always more frequent, but also applied to other regions of the world.

**Public Affairs and Administration: Concepts, Methodologies, Tools, and Applications** Oct 31 2022 Effective administration of government and governmental organizations is a crucial part of achieving success in those organizations. To develop and implement best practices, policymakers and leaders must first understand the fundamental tenants and recent advances in public administration. Public Affairs and Administration: Concepts, Methodologies, Tools, and Applications explores the concept of governmental management, public policy, and politics at all levels of organizational governance. With chapters on topics ranging from privacy and surveillance to the impact of new media on political participation, this multi-volume reference work is an important resource for policymakers, government officials, and academicians

and students of political science.

**Fighting Global Neo-Extractivism** Jun 26 2022 Fighting Global Neo-Extractivism: Fossil-Free Social Movements in South Africa analyzes social struggles over damaging new fossil fuel projects in the Global South with a focus on South Africa, Africa's biggest fossil fuel emitter. Fossil fuel extraction in South Africa has reached a new accelerated phase in which the fossil fuel frontier is moving beyond historical 'sacrifice zones' into non-traditional spaces, such as conservation parks and middle-class neighbourhoods, and provoking fervent opposition from grassroots activists. This book examines campaigns such as Frack Free South Africa and Save our iMfolozi Wilderness, viewing them as struggles against neo-extractivism driven by the state and industry. Through a series of detailed case studies, it highlights the shaping of mobilisation patterns by prior land use practices and the capacity to mobilize different social groups across race and class. Developing the notion of the fossil fuel frontier as the material and political boundary that activists in South Africa and elsewhere in the world render visible, this volume provides a theoretical framework to understanding global mobilization patterns. This timely and impassioned book will appeal to students and researchers interested in a range of subjects, including environmentalism, social movements, political ecology, and development studies.

**South African AIDS Activism and Global Health Politics** Aug 24 2019 South Africa has the world's largest number of people living with HIV. This book offers a history of AIDS activism in South Africa from its origins in gay and anti-apartheid activism to the formation and consolidation of the Treatment Action Campaign (TAC), including its central role in the global HIV treatment access movement.

African Nurse Pioneers in KwaZulu/Natal - 1920-2000 Oct 07 2020 This book is about seven African nurse pioneers in KwaZulu/Natal from 1920 to 2000. The author captures the early nursing activities of the 1920s to 1970 and then moves to nurses that entered the health services in the 1950s. The author also presents two nurses that worked outside South Africa i.e. did their pioneering nursing in Saudi Arabia and the United States of America. The author does not scoop nursing out of its context but creates a narrative that resonates in lived experiences in a world dominated by the Africanization of poverty, the feminization of poverty, globalization, racism and xenophobia.

*Information Communication Technologies: Concepts, Methodologies, Tools, and Applications* Aug 05 2020 The rapid development of information communication technologies (ICTs) is having a profound impact across numerous aspects of social, economic, and cultural activity worldwide, and keeping pace with the associated effects, implications, opportunities, and pitfalls has been challenging to researchers in diverse realms ranging from education to competitive intelligence.

**AIDS, Intimacy and Care in Rural KwaZulu-Natal** Nov 19 2021 This book describes how HIV/AIDS became part of the lives of the people of the mountainous Okhahlamba in the South African province of KwaZulu-Natal. Based on extensive research in the area between 2003 and 2006, the author shows what impact the disease had - and still does - for adults and children, and the different ways people tried to find answers to the devastating presence of HIV / AIDS. Henderson focuses on informal care by family members and volunteers at a time when anti-retroviral drugs were not yet available. She also shows what it meant to the community once the drugs became available.

*Air Pollution Modeling and its Application XVIII* Jun 02 2020 Recent developments in air pollution modeling are explored as a series of contributions from researchers at the forefront of their field. This book on air quality modeling and its applications is focused on local, urban, regional and intercontinental modeling, data assimilation and air quality forecasting, model assessment and validation, aerosol transformation, the relationship between air quality and human health and the effects of climate change on air quality. It consists of a series of papers that were presented at the 28th NATO/CCMS Conference on Air Pollution Modeling and its Application held in Leipzig, Germany, May 15-19, 2006. It is intended as reference material for students and professors interested in air pollution modeling at the graduate level as well as researchers and professionals involved in developing and utilizing air pollution models. \*Discusses cutting-edge developments on air pollution modeling and air quality issues \*Presents topical and highly relevant subjects to the air quality and modeling research community \*Provides material that can be used to further improve air quality modeling and to inform the community about recent and novel developments in the field

*Achieving Equity and Quality in Higher Education* May 26 2022 Across the world, higher education is witnessing exponential growth in both student participation and types of educational providers. One key phenomenon of this growth is an increase in student diversity: governments are widening access to higher education for students from traditionally underrepresented groups. However, this raises questions about whether this rapid growth may in fact compromise academic quality. This book presents case studies of how higher education institutions in diverse countries are maintaining academic excellence while increasing the access and participation of students from historically underrepresented backgrounds. Including case studies spanning four continents, the authors and editors examine whether increasing widening participation positively impacts upon academic quality. This volume will be of interest and value to students and scholars of global higher education, representation and participation in education, and quality in higher education.

*Apartheid No More* Jun 14 2021 The South African higher education system has historically been characterized by racial and gender inequalities inherited from the discriminatory practices of the apartheid era. In response to the demise of apartheid in South Africa, educational institutions are engaged in efforts to redefine their mission to reflect values of the "New South Africa." In order to portray how institutions from divergent historical contexts are addressing the challenge to create new identities Mabokela and King include case studies on South Africa tertiary institutions involved in this transformation.
