Calculus of a Single Variable:

Early Transcendental

Functions Sep 30 2019

Designed for the first two semesters of a three-semester engineering calculus course, *Calculus of a Single Variable:*

Early Transcendental Functions, 4/e, continues to offer instructors and students innovative teaching and learning resources. Two primary objectives guided the authors in the revision of this book: to develop precise, readable materials for students that clearly define and demonstrate concepts and rules of calculus; and to design comprehensive teaching resources for instructors that employ proven pedagogical techniques and save time. The Larson/Hostetler/Edwards Calculus program offers a solution to address the needs of any calculus course and any level of calculus student. *Calculus of a Single Variable: Early Transcendental Functions, 4/e*, contains Chapters 1-10 of the full *Calculus: Early Transcendental Functions, 4/e*, text. Every edition from the first to the fourth of *Calculus: Early Transcendental Function, 4/e*, has made the mastery of traditional calculus skills a priority, while embracing the best features of new

multivariable calculus. This book emphasizes the interplay of geometry, analysis through linear algebra, and approximation of nonlinear mappings by linear ones. The classical applications and computational methods that are responsible for much of the interest and importance of calculus are also considered. This text is organized into six chapters. Chapter I deals with linear algebra and geometry of Euclidean n -space R^n . The multivariable differential calculus is treated in Chapters II and III, while multivariable integral calculus is covered in Chapters IV and V. The last chapter is devoted to venerable problems of the calculus of variations. This publication is intended for students who have completed a standard introductory calculus sequence.

Spirit Work and the Science of Collaboration Mar 05 2020

Spirit is the essence of character—of what it means to be human. Finding hope in the power of collaboration underpinned by ‘spirit work’-- the care and love of students as learners-- Fullan & Edwards capture how some school districts are creating a deep learning environment for all. COVID-19, racial inequity, polarizing politics, mass misinformation, and myriad other challenges have made the future of education seem bleaker than ever. Spirit Work and the Science of Collaboration speaks directly to leaders’ hearts and advocates for the development of two qualities that will bring back hope for the future of education: "spirit work" and the science of collaboration. Spirit work centers love and care for students, staff, and communities as the impetus for

creating a positive culture, while collaboration is the vehicle for manifesting that spirit work. Through powerful case studies and vignettes, the authors show how spirit and collaboration represent revolutionary potential for education. Readers will find A lifeline amid overwhelming conditions. Hope for themselves and the future of education Practical ideas for building cohesion throughout school communities We cannot allow our best advocates for children to be consumed by today’s challenges. Spirit work and collaboration can pave the way to a brighter future.
