The Cambridge Economic History of China Mar 07 2021 China's rise as the world's second-largest
economy surely is the most dramatic development in the global economy since the year 2000. Volume
II, which spans China's two turbulent centuries from 1800, charts this wrenching process of an ancient
empire being transformed to re-emerge as a major world power. This volume for the first time brings
together the fruits of pioneering international scholarship in all dimensions of economic history to
provide an authoritative and comprehensive overview of this tumultuous and dramatic transformation. In
many cases, it offers a fundamental reinterpretation of major themes in Chinese economic history, such
as the role of ideology, the rise of new institutions, human capital and public infrastructure, the impact of
Western and Japanese imperialism, the role of external trade and investment, and the evolution of
living standards in both the pre-Communist and Communist eras. The volume includes seven important
chapters on the Mao and reform eras and provides a critical historical perspective linking the past with
the present and future.

Carpathia Oct 02 2020 Romania is a true cultural melting pot, rooted in Greek and Turkish traditions in
the south, Hungarian and Saxon in the north and Slavic in the east and west. Carpathia, the first book
from food stylist and cooking enthusiast Irina Georgescu, aims to introduce readers to Romania's bold,
inventive and delicious cuisine. Bringing the country to life with stunning photography and recipes, it will
take the reader on a culinary journey to the very heart of the Balkans, exploring it's history and
landscape through it's traditions and food. From fragrant pilafs, sour borsch and hearty stews, to
intricate and moreish desserts, this book celebrates the dishes from a culture living at the crossroads of
eastern and western traditions.

Bioarchaeology of Marginalized People Dec 24 2019 Bioarchaeology of Marginalized People amplifies the voices of marginalized or powerless individuals. Following previous work done by physical anthropologists on the biology of poverty, this volume focuses on the voices of past actors who would normally be subsumed within a cohort or whose stories represent those of the minority. The physical effects of marginalization – manifest as skeletal markers of stress and disease – are read in their historical contexts to better understand vulnerability and the social determinants of health in the past. Bioarchaeological, archaeological, and historical datasets are integrated to explore the varied ways in which individuals may be marginalized both during and after their lifespan. By focusing on previously excluded voices this volume enriches our understanding of the lived experience of individuals in the past. This volume queries the diverse meanings of marginalization, from physical or social peripheralization, to identity loss within a majority population, to a collective forgetting that excludes specific groups. Contributors to the volume highlight the histories of individuals who did not record their own stories, including two disparate Ancient Egyptian women and individuals from a high-status Indigenous cemetery in British Columbia. Additional chapters examine the marginalized individuals whose bodies comprise the Robert J. Terry anatomical collection and investigate inequalities in health status in individuals from Canada, the United States, and the United Kingdom. Modern clinical population health research is examined through a historical lens, bringing a new perspective to the critical public health interventions occurring today. Together, these papers highlight the role that biological anthropologists play both in contributing to and challenging the marginalization of past populations. Highlights the histories and stories of individuals whose voices were silenced, such as workhouse inmates, migrants, those of low socioeconomic status, the chronically ill, and those living in communities without a written language Provides a holistic and more complete understanding of the lived experiences of the past, as well as changes in populations through time Offers an interdisciplinary discussion with contributions from a wide variety of international authors

Principles and Practice of Fertility Preservation Nov 15 2021 The specialty of fertility preservation offers patients with cancer, who are rendered infertile by chemo- and radiotherapy, the opportunity to realize their reproductive potential. This gold-standard publication defines the specialty. The full range of techniques and scientific concepts is covered in detail, and the author team includes many of the world's leading experts in the field. The book opens with introductions to fertility preservation in both cancer and non-cancer patients, followed by cancer biology, epidemiology and treatment, and reproductive biology and cryobiology. Subsequent sections cover fertility preservation strategies in males and females, including medical/surgical procedures, ART, cryopreservation and transplantation of both ovarian tissue and the whole ovary, and in-vitro follicle growth and maturation. Concluding chapters address future technologies, as well as ethical, legal and religious issues. Richly illustrated throughout, this is a key resource for all clinicians specializing in reproductive medicine, gynecology, oncology, hematology, endocrinology and infertility.

Sicilia Jan 25 2020 Sicily is both at once a frugal peasant land with a simple robust cuisine, but also full of ornate glamour and extravagance. A most beautiful and complex contradiction in terms, Ben Tish unlocks the secrets of Sicily's culture and food within these pages, diving into its diverse tapestry of cultural influences. States of Development Aug 20 2019 The spectre of poverty, disease and ignorance still haunts much of the developing world today. But not everywhere. Some societies, such as Botswana, Mauritius, Malaysia and Korea, are successfully transforming the material life of the majority of their citizens, though not always without costs in terms of human rights. Others, such as Peru, Zaire, India and the Philippines, appear incapable of doing so. In this widely comparative study, Adrian Leftwich examines why this has happened. Focusing on the politics and states of a wide range of developing societies, Leftwich generates a model of the 'developmental state' as a particular sub-type of state in the modern world, and argues the case for the primacy of politics in development. He challenges a number of contemporary orthodoxies in western overseas development policy, especially the current insistence that democracy is a necessary condition for development. States of Development will be essential reading for students and scholars in development studies and politics.

Physical Gels from Biological and Synthetic Polymers Jul 31 2020 Presenting a unique perspective on state-of-the-art physical gels, this interdisciplinary guide provides a complete, critical analysis of the field and highlights recent developments. It shows the interconnections between the key aspects of gels, from molecules and structure through to rheological and functional properties, with each chapter focusing on a different class of gel. There is also a final chapter covering innovative systems and applications, providing the information needed to understand current and future practical applications of

gels in the pharmaceutical, agricultural, cosmetic, chemical and food industries. Many research teams are involved in the field of gels, including theoreticians, experimentalists and chemical engineers, but this interdisciplinary book collates and rationalises the many different points of view to provide a clear understanding of these complex systems for researchers and graduate students.

Chasing Smoke: Cooking over Fire Around the Levant Sep 20 2019 The award-winning Honey's are back with more delicious dishes from the Middle East, and this time their focus is firmly on the grill. Join Sarit and Itamar on a journey filled with flavour and fire as they visit their favourite cities collecting recipes, stories and the best of culinary culture along the way. Fire has always seasoned Sarit and Itamar's food – both at home and in their own grill house, Honey & Smoke – and now you too will fall in love with this comforting, no-fuss, fare. Organised into five ingredient-led chapters (Fruit & Vegetables; Fish & Seafood; Birds; Lamb & Other Meats; and Bread & Unmissables), it couldn't be easier to create a simple mouth-watering meal for two or a joyful feast for your friends and family. From grilled peaches with almond tahini and charred endive, figs with manouri cheese and pomegranate sauce, prawns in honey and fresh coriander, and smoked short ribs, the scent and flavour created by the meeting of heat, wood, flesh and plant will never fail to lend your food a special, magical quality. You'll also find five city features on Alexandria, Egypt; Amman, Jordan; Acre, Israel; Adana, Turkey; and Thessaloniki, Greece, all bursting with inspiration from the best fire-fuelled eateries each destination has to offer – from the greatest grill houses to the humblest roadside kebab joints, balcony culture and open fires on shores. Complete with culinary souvenirs including beautiful ingredient combinations, age-old tricks and techniques, curious kitchen tools, and clever 'rainy day' advice on how to recreate the dishes using a conventional oven or stovetop, heat the coals, come together and cook with the flavour of smoke.

Beyond the Bones Apr 27 2020 Interdisciplinary research is a rewarding enterprise, but there are inherent challenges, especially in current anthropological study. Anthropologists investigate questions concerning health, disease, and the life course in past and contemporary societies, necessitating interdisciplinary collaboration. Tackling these 'big picture' questions related to human health-states requires understanding and integrating social, historical, environmental, and biological contexts and uniting qualitative and quantitative data from divergent sources and technologies. The crucial interplay between new technologies and traditional approaches to anthropology necessitates innovative approaches that promote the emergence of new and alternate views. *Beyond the Bones: Engaging with Disparate Datasets* fills an emerging niche, providing a forum in which anthropology students and scholars wrestle with the fundamental possibilities and limitations in uniting multiple lines of evidence. This text demonstrates the importance of a multi-faceted approach to research design and data collection and provides concrete examples of research questions, designs, and results that are produced through the integration of different methods, providing guidance for future researchers and fostering the creation of constructive discourse. Contributions from various experts in the field highlight lines of evidence as varied as skeletal remains, cemetery reports, hospital records, digital radiographs, ancient DNA, clinical datasets, linguistic models, and nutritional interviews, including discussions of the problems, limitations, and benefits of drawing upon and comparing datasets, while illuminating the many ways in which anthropologists are using multiple data sources to unravel larger conceptual

questions in anthropology. Examines how disparate datasets are combined using case studies from current research. Draws on multiple sub-disciplines of anthropological research to produce a holistic overview that speaks to anthropology as a discipline. Explores examples drawn from qualitative, quantitative, and mixed methods research to illustrate the breadth of anthropological work.

The Cambridge Companion to Margaret Atwood Jul 11 2021 Margaret Atwood's international celebrity has given a new visibility to Canadian literature in English. This Companion provides a comprehensive

critical account of Atwood's writing across the wide range of genres within which she has worked for the past forty years, while paying attention to her Canadian cultural context and the multiple dimensions of her celebrity. The main concern is with Atwood the writer, but there is also Atwood the media star and public performer, cultural critic, environmentalist and human rights spokeswoman, social and political satirist, and mythmaker. This immensely varied profile is addressed in a series of chapters which cover biographical, textual, and contextual issues. The Introduction contains an analysis of dominant trends in Atwood criticism since the 1970s, while the essays by twelve leading international Atwood critics represent the wide range of different perspectives in current Atwood scholarship.

ICPAC 2014 was attended by 150 participants from 30 countries. The chapters in this book reflect a wide range of fundamental and applied research in chemistry and interdisciplinary subjects. Crystallizing Ideas - The Role of Chemistry is written for graduates, postgraduates, researchers in industry and academia who have an interest in the fields ranging from fundamental to applied chemistry.

The Merchants of Zigong
Sep 01 2020 From its dramatic expansion in the early nineteenth century to its decline in the late 1930s, salt production in Zigong was one of the largest and only indigenous large-scale industries in China. Madeleine Zelin's history details the novel ways in which Zigong merchants mobilized capital through financial-industrial networks and spurred growth by developing new technologies, capturing markets, and building integrated business organizations. She provides new insight into the forces and institutions that shaped Chinese economic and social development (independent of Western or Japanese influence) and challenges long-held beliefs that social structure, state extraction, the absence of modern banking, and cultural bias against business precluded industrial development in China.

Madeleine's Children
Aug 24 2022 In 1759 a baby girl was born to an impoverished family on the Indian subcontinent. Her parents pawned her into bondage as a way to survive famine. A Portuguese slaver sold the girl to a pious French spinster in Bengal, where she was baptized as Madeleine. Eventually she was taken to France by way of Ile de France (Mauritius), and from there to Ile Bourbon (Reunion), where she worked on the plantation of the Routier family and gave birth to three children: Maurice, Constance, and Furcy. Following the master's death in 1787, Madame Routier registered Madeleine's manumission, making her free on paper and thus exempting the Routiers from paying the annual head tax on slaves. However, according to Madeleine's children, she was never told that she was free. She continued to serve the widow Routier for another nineteen years, through the Revolution, France's general emancipation of 1794 (which the colonists of the Indian Ocean successfully repelled), the Napoleonic restoration of slavery, and British occupation of France's Indian Ocean colonies. Not until the widow Routier died in 1808 did Madeleine learn of her freedom and that the Routier estate owed her nineteen years of back wages. Madeleine tried to use the Routiers' debt to negotiate for her son Furcy's freedom from Joseph Lory, the Routiers' son-in-law and heir, but Lory tricked the illiterate Madeleine into signing papers that, in essence, consigned Furcy to Lory as his slave for life. While Lory invested in slave smuggling and helped introduce sugar cultivation to Ile Bourbon, Furcy spent the next quarter century trying to obtain legal recognition of his free status as he moved from French Ile Bourbon to British Mauritius and then to Paris. His legal actions produced hundreds of pages that permit reconstruction of the lives of Furcy and his family in astonishing detail. The Cour Royale de Paris, France's highest court of appeal, finally ruled Furcy ne libre (freeborn) in 1843. Eight rare extant letters signed by Furcy over two decades tell in his own words how he understood his enslavement and

freedom within these multiple legal jurisdictions and societies. France's general emancipation of 1848 erased the distinction between slavery and freedom for all former slaves but the reaction of 1851 excluded them from citizenship. The struggle for justice, respect, and equality for former slaves and their descendants would not be realized within Furcy's lifetime. The life stories of Madeleine and her three children are especially precious because, unlike scores of slave narratives published in the United States and England in the eighteenth and nineteenth centuries, no autobiographical narrative of a slave held by French- published or unpublished- exists. This will be one of only a handful of modern biographies of enslaved people within France's empire, in French or in English, and the only one to explore transformations in slavery and freedom in French colonies of the Indian Ocean. This story is also significant because of the legal arguments advanced in Furcy's freedom suits between 1817 and 1843. Furcy's lawyers argued that he was free by race (as the descendent of an Indian rather than an African mother) and also by Free Soil (the legal principle whereby any slave setting foot on French soil thereby became free, since Madeleine resided in France before Furcy was born). Parallel debates surround the American case of Dred Scott, who began his long and unsuccessful bid for freedom in 1846 in the former French colonial city of St. Louis, Missouri, just three years after the French Cour Royale de Paris upheld Furcy's freedom on the basis of Free Soil. However, the French ruling that Furcy was free by Free Soil and the rejection of the racial argument offer a historical counterpoint to the infamous Taney opinion of 1857. The gripping story of Madeleine and her children is especially well-suited to exploring the developments of French colonization, plantation slavery, race, sugar cultivation, and abolitionism. A fluid narrative, it should have appeal for readers of the history of slavery, world history, Indian Ocean history, and French colonial history.

Reconstructing Democracy Apr 08 2021 "An urgent manifesto for the reconstruction of democratic belonging in our troubled times." --Davide Panagia Across the world, democracies are suffering from a disconnect between the people and political elites. In communities where jobs and industry are scarce, many feel the government is incapable of understanding their needs or addressing their problems. The resulting frustration has fueled the success of destabilizing demagogues. To reverse this pattern and restore responsible government, we need to reinvigorate democracy at the local level. But what does that mean? Drawing on examples of successful community building in cities large and small, from a shrinking village in rural Austria to a neglected section of San Diego, Reconstructing Democracy makes a powerful case for re-engaging citizens. It highlights innovative grassroots projects and shows how local activists can form alliances and discover their own power to solve problems.

Madeleine - Losing a Soul Mate to Cancer Sep 25 2022 This emotional rollercoaster describes the journey of one man losing his lifelong partner to cancer and details how he tries to come to terms with the bereavement and prepares to face life without her. It is an absorbing read, taking you right back to the early days of courtship and romance, and how the young couple married and moved from their native land in Mauritius to set up life in Australia. Cancer appears on the fringe of things with minor effect until Clancy's wife Madeleine is diagnosed with the disease herself. The couple's courageous ongoing battle over a number of years is detailed along with the emotional highs and lows many families face when dealing with this disease in their midst. What makes this book stand out above others is that the author has with great openness, honesty and often raw intimate detail poured out his heart as he struggles in his efforts to save his wife from what turns out to be a terminal illness. After her passing, the reader is left feeling the emptiness, the loss and utter despair as if it was their own. The remainder of the story will surprise and provide plenty of food for thought. There are few authors who can in the simplicity of their writing make the words smile through the tears. A beautiful never-ending love story showing great courage from both sides of the divide.

Code Name Madeleine: A Sufi Spy in Nazi-Occupied Paris May 09 2021 A CrimeReads Most Anticipated Book of 2020 A Padma Lakshmi Favorite Read of 2021 The captivating story of the valiant Noor Inayat Khan, daughter of an Indian Sufi mystic and unlikely World War II heroine. Raised in a lush suburb of 1920s Paris, Noor Inayat Khan was an introspective musician and writer, dedicated to her family and to her father's spiritual values of harmony, beauty, and tolerance. She did not seem destined for wartime heroism. Yet, faced with the evils of Nazi violence and the German occupation of France, Noor joined the British Special Operations Executive and trained in espionage, sabotage, and reconnaissance. She returned to Paris under an assumed identity immediately before the Germans mopped up the Allies' largest communications network in France. For crucial months of the war, Noor was the only wireless operator there sending critical information to London, significantly aiding the success of the Allied landing on D-Day. Code-named Madeleine, she became a high-value target for the Gestapo. When she was eventually captured, Noor attempted two daring escapes before she was sent to Dachau and killed just months before the end of the war. Carefully distilled from dozens of interviews, newly discovered manuscripts, official documents, and personal letters, Code Name Madeleine is both a compelling, deeply researched history and a thrilling tribute to Noor Inayat Khan, whose courage and faith guided her through the most brutal regime in history.
