Royal Events Nov 27 2019 Royal events such as coronations and jubilees encompass a wide spectrum of planned events involving monarchs and their families that are strategically designed to reinforce the role of royalty within social and political structures. Royal events may have a long heritage, but often involve traditions that are invented, revived or undergoing major innovations in response to changing times or to meet different purposes. The change from absolutism towards constitutional monarchies has seen a shift towards using royal events to promote national identity, community and

inclusiveness. While the function and meaning of royal ritual and ceremony is a product of its particular political, economic and cultural context, conversely, royal events are often an influence on the broader milieu. This book is the first to explore royal events within the context of Events Studies, and takes an historical approach, examining the development of royal events through different periods. It starts with four broad pre-modern eras, namely Classical, Byzantine, the Dark Ages and the Medieval Period, then moves through to the early modern dynasties such as the Tudors, Stuarts, Georgians and Bourbons and on to contemporary times, incorporating the Victorian and Edwardian eras and the current reign of Elizabeth II, including the legacy of Diana and an analysis of current issues affecting royal events. Themes emphasised throughout include the institutional dynamism of royalty, the invention of tradition, the ritual structure of events, the impact of the media and the influence of individual tastemakers. This multidisciplinary work will appeal to postgraduate students and academics from a wide variety of disciplines, including cultural studies, history, tourism, events and sociology.

Customarily, when there was a memorable congratulatory event, the Koreans arranged a banquet to entertain with utmost sincerity. It was a widespread practice in every society. The records explicitly display the scenes of banquets where the participating guests are delightedly enjoying the drinks, dance and music, while the celebratory rituals are performed. Human Resource Management for Events May 14 2021 Human Resource Management for Events is the first text to cover management of human resources in the event environment. Linking theory, research and application it covers the differing and various types of event in which human resource management is key, such as: * Business Events - a vast sector including events people who manage conferences, exhibitions, incentive trips and individual business travel. * Sporting Events - this sector includes sporting events ranging from the Olympic Games, Rugby World Cup, Soccer World Cup, Tour de France, Grand Prix to many smaller, local sporting events. * Arts and Entertainment - the logistics, risk and financial issues facing entertainment events are leading to the development of more sophisticated operational skills for this sector. Music festivals are increasingly popular. * Public Events - civic ceremonies, parades, celebrations, festivals and protests all fall within the scope of public events. Planning, approval and risk management are increasingly on the agenda for all levels of government. The particular challenges provided by such events are varied. The size of the workforce explodes at the time of the event to include the event management team, many paid staff, hundreds of volunteers and multiple contractors, such as food vendors and cleaning teams. Everyone working on the site comes into the scope of the event workforce. Little time is available for training and motivation plays a key role in retention and customer service. Decision making occurs on the run and the event is over before anyone can think about performance appraisal. The environment is further characterised by a fast pace, high stress levels and many workers are fatigued by the bump in period before the event audience pours through the gates to add yet another level of pressure. These features of the human resources environment are quite different to those of the traditional workforce. Human Resource Management for Events is vital reading for both students and practitioners involved in this crucially important aspect of event management.

Rituals and Traditional Events in the Modern World Sep 29 2022 Many events have evolved over centuries, drawing on local customs and conditions. However, as the world becomes increasingly globalised, traditional events and the identities they support are increasingly being challenged and rituals may be lost. Reacting against this trend towards homogeneity, communities strive to preserve and even recreate their traditional events, which may require rituals to be resurrected or reinvented for a new audience. The aim of this book is to explore the role of traditional events and rituals in the modern world. The 16 chapters cover a range of case studies of the performance of ritual through events, including their historical antecedents and development over time, as well as their role in society, link with identities both seemingly fixed and fluid and their continued relevance. The cases examined are not museum pieces, but rather vibrant festivals and events that continue to persist. Drawing on the power of history and cultural tradition, they are manifestations of heritage, existing in three temporalities: celebrating the past, occurring in the present and aiming to continue into and influence the future. Iconic events including Chinese New Year, Hogmanay and the New Orleans Mardi Gras are examined and examples are drawn from a diverse range of countries such as South Korea, China, Laos, the United States, Scotland, Italy, India and Haiti. This volume provides a deep understanding upon the role of tradition and ritual within events, from a global perspective and will be valuable reading for students, researchers and academics interested in events, heritage and culture.

A Year in Seventeenth-Century Kyoto Sep 05 2020 Before the twentieth century, Japanese religious and cultural life was shaped by a variety of yearly ceremonies, festivals, and customs. These annual events (nenju gyoji) included Shinto festivals in which participants danced through the night to boisterous music and Buddhist temple practices that honored deities, great priests, or temple founders with solemn rituals and prayers—and sometimes, when the Buddha was invoked, raucous dancing. Temples also hosted popular fairs, where holy objects and artwork were displayed to the faithful and curious. Countless other celebrations were held annually at the residences of the nobility and military elite and at commoner domiciles. Kyoto, the imperial—and cultural—capital since the eighth century, was the center of many of these events. From Kyoto festivals, rituals, and celebrations diffused to other parts of the land, ultimately shaping religious, artistic, and everyday life as a whole. By the seventeenth century the Kyoto public wished to inform itself more accurately about nenju gyoji and their dates and meanings. As a result, a growing number of guidebooks and almanacs were written and published for the urban populace. This volume is the first to present translations of two such publications. Introductory chapters explain Japanese conceptions of time and space within which annual celebrations took place and outline how ceremonies and festivals in and about Kyoto were chronicled, described, and interpreted from the earliest times to the seventeenth century. The final two chapters offer annotated translations of writings from the seventeenth century that catalogue and describe the dates, sites, meanings, and histories of many Kyoto annual events. The two

works, one largely historical, the other more ethnographic in nature, indicate not only when and where observances and commemorations took place, but also how their authors understood the significance of each. Both translations feature a large number of illustrations depicting events as they appeared in Kyoto at the time.

Events Management Nov 19 2021 Event management is the co-ordination, running and planning of all the people, teams and features that come together to create every kind of event. It is the application of project management to the creation and development of large scale events such as festivals, conferences, ceremonies, formal parties, concerts, or conventions. It involves studying the brand, identifying the target audience, devising the event concept, planning the logistics and coordinating the technical aspects before actually launching the event. The process of planning and co-ordinating the event is usually referred to as event planning and can include budgeting, scheduling, site selection, acquiring necessary permits, coordinating transportation and parking, arranging for speakers or entertainers, arranging decor, event security, catering and emergency plans. Event managers are needed in almost any kind of business - entertainment, finance, government, retail, fashion, sport, music and so their day to day job can be filled with a huge range of exciting challenges and unique situations. Events usually require many different teams to come together, often including several external suppliers. Successful events depend on every team and every team member doing their job to a high standard, as well as flexibility and a commitment to good crossteam communication. The event industry is all about exceeding the expectations of all parties involved in the events, and design is one of the key ways to impress. Even in times of economic recession, events remain invaluable to companies as a sure way to build brand reputation, drive consumer confidence and give people experiences to remember.
