Equality by Default Sep 05 2020 Philippe Beneton, a prominent French religious conservative, has long meditated on Tocqueville, and *Equality by Default* is Tocquevillian in that it does not offer a partisan polemic, but rather paints a picture of contemporary life—a picture that is also a guide for discernment for those who have a difficult time "seeing" contemporary liberalism for what it is. Artfully translated by Ralph Hancock, *Equality by Default* offers a unique and strikingly insightful account of the late-modern mind.

Mindblindness Feb 08 2021 In *Mindblindness*, Simon Baron-Cohen presents a model of the evolution and development of "mindreading." He argues that we mindread all the time, effortlessly, automatically, and mostly unconsciously. It is the natural way in which we interpret, predict, and participate in social behavior and communication. We ascribe mental states to people: states such as thoughts, desires, knowledge, and intentions. Building on many years of research, Baron-Cohen concludes that children with autism, suffer from "mindblindness" as a result of a selective impairment in mindreading. For these children, the world is essentially devoid of mental things. Baron-Cohen develops a theory that draws on data from comparative psychology, from developmental, and from neuropsychology. He argues that specific neurocognitive mechanisms have evolved that allow us to mindread, to make sense of actions, to interpret gazes as meaningful, and to decode "the language of the eyes." Essays on Music Oct 26 2019 "A book of landmark importance. It is unprecedented in its design: a brilliantly selected group of essays on music coupled with lucid, deeply incisive, and in every way masterly analysis of Adorno's thinking about music. No one who studies Adorno and music will be able to dispense with it; and if they can afford only one book on Adorno and music, this will be the one. For in miniature, it contains everything one needs: a collection of exceptionally important writings on all the principal aspects of music and musical life with which Adorno dealt; totally reliable scholarship; and powerfully illuminating commentary that will help readers at all levels read and re-read the essays in question."—Rose Rosengard Subotnik, author of *Deconstructive Variations: Music and Reason in Western Society* "An invaluable contribution to Adorno scholarship, with well chosen essays on composers, works, the culture industry, popular music, kitsch, and technology. Leppert's introduction and commentaries are consistently useful; his attention to secondary literature remarkable; his interpretation responsible. The new translations by Susan Gillespie (and others) are outstanding not only for their care and readability, but also for their sensitivity to Adorno's forms and styles."—Lydia Goehr, author of *The Quest for Voice: Music, Politics and the Limits of Philosophy* "With its careful, full edition of Adorno's important musical texts and its exhaustive yet eminently readable commentaries, Richard Leppert's magisterial book represents a brilliant

solution to the age-old dilemma of bringing together primary text and interpretation in one volume."—James Deaville, Director, School of the Arts, McMaster University "The developing variations of Adorno's life-long involvement with musical themes are fully audible in this remarkable collection. What might be called his 'literature on notes' brilliantly complements the 'notes to literature' he devoted to the written word. Richard Leppert's superb commentaries constitute a book-length contribution in their own right, which will enlighten and challenge even the most learned of Adorno scholars."—Martin Jay, author of *The Dialectical Imagination: A History of The Frankfurt School and the Institute of Social Research* "There is afoot in Anglo-American musicology today the first wholesale reconsideration of Adorno's thought since the pioneering work of Rose Rosengard Subotnik around 1980. *Essays on Music* will play a central role in this effort. It will do so because Richard Leppert has culled Adorno's writings so as to make clear to musicologists the place of music in the broad critique of modernity that was Adorno's overarching project; and it will do so because Leppert has explained these writings, in commentaries that amount to a book-length study, so as to reveal to non-musicologists the essentially musical foundation of this project. No one interested in Adorno from any perspective—or, for that matter, in modernity and music all told—can afford to ignore *Essays on Music*."—Gary Tomlinson, author of *Metaphysical Song: An Essay on Opera* "This book is both a major achievement by its author-editor and a remarkable act of scholarly generosity for the rest of us. Until now, English translations of Adorno's major essays on music have been scattered and often unreliable. Until now, there has been no comprehensive scholarly treatment of Adorno's musical thinking. This volume remedies both problems at a single stroke. It will be read equally—and eagerly—for Adorno's texts and for Richard Leppert's commentary on them, both of which will continue to be essential resources as musical scholarship seeks increasingly to come to grips with the social contexts and effects of music. No one knows Adorno better than Leppert, and no one is better equipped to clarify the complex interweaving of sociology, philosophy, and musical aesthetics that is central to Adorno's work. From now on, everyone who reads Adorno on music, whether a beginner or an expert, is in Richard Leppert's debt for devoting his exceptional gifts of learning and lucidity to this project."—Lawrence Kramer, author of *Musical Meaning: Toward a Critical History*

An Essay on Man May 14 2021 Drawing upon a wealth of scientific, anthropological and historical data, the author examines man's efforts to understand himself and to deal with the problems of his universe through the creation and use of symbols. Analyzes the major symbolic forms of human enterprise: language, myth, art, religion, history and science. Discusses such subjects as the origins of language, doctrines of aesthetics, Frazer's theory of magic, the religious significance of taboo, the symbolic implications of philosophic thought from Heraclitus to Kierkegaard and Einstein.

An Essay on Liberation Oct 31 2022 In this concise and startling book, the author of *One-Dimensional Man* argues that the time for utopian speculation has come. Marcuse argues that the traditional conceptions of human freedom have been rendered obsolete by the development of advanced industrial society. Social theory can no longer content itself with repeating the formula, "from each according to his ability, to each according to his needs," but must now investigate the nature of human needs themselves. Marcuse's claim is that even if production were controlled and determined by the workers, society would still be repressive—unless the workers themselves had the needs and aspirations of free men. Ranging from philosophical anthropology to aesthetics *An Essay on Liberation* attempts to outline—in a highly speculative and tentative fashion—the new possibilities for human liberation. The Essay contains the following chapters: *A Biological Foundation for Socialism?*, *The New Sensibility*, *Subverting Forces—in Transition*, and *Solidarity*.

Custom Sep 17 2021 In *Custom*, Ferdinand Tonnies illustrates the relationship of custom to various aspects of culture, such as religion, gender, and family. Tonnies argues that all social norms are evolved from a basic sense of order, which is largely derived from customs. As such, custom refers to the ideal, and the desirable, and it mediates subjective aspects of social life. Tonnies makes observations in *Custom* that are just as true today as when they were written over a century ago. The pivotal idea in Tonnies work is the observation that custom, like its individual counterpart habit, has three distinct aspects: a fact--an actual way of conduct; a norm--a general rule of conduct; and a will. The analysis, extended into the field of collective behaviour, helps to explain how far custom can be regarded as a manifestation of a common will. *Custom* is a classic contribution in the grand canon of law and society scholarship. Moreover, the volume introduces several key elements of Tonnies' work focusing on broader sociological thought, which benefits both the theoretical understanding of law as an object of social science reflection, as well as provides empirical insights into the roles of law in society.

The Reconciled Body Aug 24 2019 What is elegance? Is it a quality of movement or gesture? Or is it rather connected to the way someone dresses up? Can we think of an elegant object or an elegant speech? These questions point at the ambiguity elegance presents any person wanting to reflect on it. *The Reconciled Body* responds to this challenge by looking at the birthplace of elegance: a subject's experience. From movement consciousness to dreaming, from attention to the upright posture, this book presents the reader with first-person moments that are fundamental in shaping someone's intimate sense of elegance. In the end, the reader is invited to reflect on the value of elegance and its potential in reconfiguring someone's I-world relation: is it worth opposing the nature of consciousness to experience the self and other in a radically different manner? *** Simionescu's brilliant formula on elegance conveys a sense of measure and a self-limitation in one's unconventional conducts, fulfilling the characteristic, albeit subtle, moral nuance carried by the meaning of the word "elegance." Following the main methodological rule of classical phenomenology, and at the same time drawing on contemporary research about embodiment and movement, the author finds his way to "material" axiology by a bottom-up analysis of the intuitive, lived matter of this value, laying the foundations of a phenomenology of elegance. Vessels of Time Aug 05 2020 Most studies assume time to be axiomatically given, in terms of which other notions of time become different or non-existent; and are dissolved in other domains (social structure, economy, kinship, ritual). What becomes of the question of time (put in terms of an indigenous equivalent of a western concept, or-vice versa) when we ask who is doing the category construction, for whom, when, where? What is the purpose underlying the comparison? Is it an innocent study of temporality or a marker of progress, modernization, dependence? Half the essay is thus concerned with questions (theoretical, methodological, interpretative) of what is involved when we talk about time in different societies, Western and non-Western, in contemporary and historical contexts. The other half is thematically even broader with the addition of changes that have occurred over the past two centuries, leaving no society untouched.

ISBN 1-58477-357-X. Cloth. \$150. * Reprint of the scarce first edition of the first American book on the subject. A true "Renaissance man," Fessenden [1771-1837] was a lawyer, poet, journalist, inventor and venture capitalist who promoted various inventions. He was the holder of two patents for heating devices. Also a prominent satirist, he wrote numerous pieces under the pseudonym Christopher Caustic for one of his other journals, *The Terrible Tractoration*. His treatise contains summaries of the relevant statutes, digests of leading cases (such as *Whitney v. Carter* over the invention of the cotton gin) and comparisons between the patent laws of the Unites States, Great Britain and France. The appendix contains the United States Patent Law of 1800, a bilingual collection of French laws and a set of French recommendations for improvements in the laws of the United States.

Charles Olson and Alfred North Whitehead Jan 28 2020 Annotation "Through a detailed and thoughtful study of the impact of Alfred North Whitehead's philosophy on Olson's aesthetic theory, this book points out the conceptual unity underlying what seems to be a sprawl of fragments in Olson's major work, *The Maximus Poems*." "On the one hand, concrete poetic units of *The Maximus Poems* serve as a starting point for clarifying how different elements are joined together in one unity. On the other hand, the book traces the blending of the whole poem at the macro level, following its course through a temporal progress in which the poem moves from one poetic unit to the next; that is, from a unity (of multiplicity) to a new unity (in which the previous unity is already part of the multiplicity building the new one). Thus the book illuminates Olson's theory of the Long Poem as an "all-containing" corpus, governed by metaphysical principles, equal to life itself, enacted in the process of working on *The Maximus Poems*."--BOOK JACKET. An Essay on the Principle of Population May 02 2020 The first major study of population size and its tremendous importance to the character and quality of society, this polemic examines the tendency of human numbers to outstrip their resources. Pivotal in establishing the field of demography, it remains crucial to understanding modern problems with food production and distribution. Anglican parson Thomas Robert Malthus wrote his famous essay in 1798 in response to speculations on social perfectibility aroused by the French Revolution. Because human powers of procreation so greatly exceed the production of food, Malthus explained, population will always exceed available resources, and many will inevitably live at the ragged edge of subsistence. His simple yet powerful argument — demonstrating that scarcity and inequality arise even in a society purged of all unjust laws and institutions — was highly controversial in its day. Many of Malthus' contemporaries despised him for dashing their hopes of social progress, and the grim logic of his "population principle" led Thomas Carlyle to dub economics "the dismal science." Today, Malthus' name is practically synonymous with active concern about demographic and ecological prospects, and his classic remains ever relevant to issues of social policy, theology, evolution, and the environment.

Totality and Infinity Jan 22 2022 Ever since the beginning of the modern phenomenological movement disciplined attention has been paid to various patterns of human experience as they are actually lived through in the concrete. This has brought forth many attempts to find a general philosophical position which can do justice to these experiences without reduction or distortion. In France, the best known of these recent attempts have been made by Sartre in his *Being and Nothingness* and by Merleau-Ponty in his *Phenomenology of Perception* and certain later fragments. Sartre has a keen sense for life as it is lived, and his work is marked by many penetrating descriptions. But his dualistic ontology of the *en-soi* versus the *pour-soi* has seemed over-simple and inadequate to many critics, and has been seriously qualified by the author himself in his latest Marxist work, *The Critique of Dialectical Reason*. Merleau-Ponty's major work is a lasting contribution to the phenomenology of the pre-objective world of perception. But aside from a few brief hints and sketches, he was unable, before his unfortunate death in 1961, to work out carefully his ultimate philosophical point of view. This leaves us then with the German philosopher, Heidegger, as the only contemporary thinker who has formulated a total ontology which claims to do justice to the stable results of phenomenology and to the living existential thought of our time.

An Essay on the Development of Christian Doctrine Aug 17 2021 The following pages were not in the first instance written to prove the divinity of the Catholic Religion, though ultimately they furnish a positive argument in its behalf, but to explain certain difficulties in its history, felt before now by the author himself, and commonly insisted on by Protestants in controversy, as serving to blunt the force of its *primâ facie* and general claims on our recognition. However beautiful and promising that Religion is in theory, its history, we are told, is its best refutation; the inconsistencies, found age after age in its teaching, being as patent as the simultaneous contrarieties of religious opinion manifest in the High, Low, and Broad branches of the Church of England. In reply to this specious objection, it is maintained in this Essay that, granting that some large variations of teaching in its long course of 1800 years exist, nevertheless, these, on examination, will be found to arise from the nature of the case, and to proceed on a law, and with a harmony and a definite drift, and with an analogy to Scripture revelations, which, instead of telling to their disadvantage, actually constitute an argument in their favour, as witnessing to a superintending Providence and a great Design in the mode and in the circumstances of their occurrence.
