It includes: explanations of Online databases, intranets, the different printing technologies, and on-demand printing; a survey of how we came to be where we are today, from the arrival of desktop publishing to the present situation where publishers are mixing and matching the traditional with the new; a look at the globalization of the publishing business and opportunities for micro-publishers; and an examination of the threat to the novel in its traditional form.

Rapt Jul 04 2020 A revolutionary look at how what we pay attention to

determines how we experience life Acclaimed behavioral science writer Winifred Gallagher's Rapt makes the radical argument that much of the quality of your life depends not on fame or fortune, beauty or brains, fate or coincidence, but on what you choose to pay attention to. Rapt introduces a diverse cast of characters, from researchers to artists to ranchers, to illustrate the art of living the interested life. As their stories show, by focusing on the most positive and productive elements of any situation, you can shape your inner experience and expand your world. By learning to focus, you can improve your concentration, broaden your inner horizons, and most important, feel what it means to be fully alive.

BIOSPERATIONS Jan 10 2021 This systematically organized and well-balanced book compresses within the covers of a single volume the theoretical principles and techniques involved in bio-separations, also called downstream processing. These techniques are derived from a range of subjects, for example, physical chemistry, analytical chemistry, bio-chemistry, biological science and chemical engineering. Organized in its 15 chapters, the text covers in the first few chapters topics related to chemical engineering unit operations such as filtration, centrifugation, adsorption, extraction and membrane separation as applied to bioseparations. The use of chromatography as practiced at laboratory as well as industrial scale operation and related techniques such as gel filtration, affinity and pseudoaffinity chromatography, ion-exchange chromatography, electrophoresis and related methods have been discussed. The important applications of these techniques have also been highlighted.

Theories of Turbulence Oct 07 2020 The term "turbulence" is used for a

large variety of dynamical phenomena of fluids in motion whenever the details of the flow appear to be random and average properties are of primary interest. Just as wide ranging are the theoretical methods that have been applied towards a better understanding of fluid turbulence. In this book a number of these methods are described and applied to a broad range of problems from the transition to turbulence to asymptotic turbulence when the inertial part of the spectrum is fully developed. Statistical as well as nonstatistical treatments are presented, but a complete coverage of the subject is not attempted. The book will be of interest to scientists and engineers who wish to familiarize themselves with modern developments in theories of turbulence. The fact that the properties of turbulent fluid flow are addressed from very different points of view makes this volume rather unique among presently available books on turbulence.

Shapers of Worlds Aug 05 2020 Within these pages lie eighteen stories, from eighteen worlds shaped by some of today's best writers of science fiction and fantasy, all guests on the Aurora Award-winning podcast The Worldshapers during its first year. There are never-before-seen stories by Tanya Huff, Seanan McGuire, David Weber, L.E. Modesitt, Jr., John C. Wright, D.J. Butler, Christopher Ruocchio, Shelley Adina, and Edward Willett, plus outstanding fiction by John Scalzi, Joe Haldeman, David Brin, Julie E. Czerneda, Fonda Lee, Gareth L. Powell, Dr. Charles E. Gannon, Derek Künsken, and Thoraiya Dyer. Among these authors are

international bestsellers, and winners of and nominees for the Hugo, Nebula, World Fantasy, Aurora, Sunburst, Aurealis, Ditmar, British Science Fiction Association, and Dragon Awards. Some have been writing for decades, others are at the beginning of their careers. All have honed their craft to razor-sharpness. A teenage girl finds something strange in the middle of the Canadian prairie. An exobiologist tries to liberate a giant alien enslaved on its homeworld by humans. The music of the spheres becomes literal for an Earth ship far from home. A superhero league interviews for new members. Strangers share a drink on a world where giant starships fall. Two boys, one a werewolf, one a mage, get more than they bargained for when they volunteer to fight an evil Empire. A man with amnesia accepts a most unusual offer. A young woman finds unexpected allies as she tries to win a flying-machine race in steampunk London . . . Ranging from boisterous to bleak, from humorous to harrowing, from action-filled to quiet and meditative; taking place in alternate pasts, the present day, the far, far future, and times that never were; set on Earth, in the distant reaches of space, in fantasy worlds, and in metaphysical realms, each of these stories is as unique as its creator. And yet, they all showcase one thing: the irrepressible need of human beings to create, to imagine, to tell stories: To shape worlds.

Tram Windows Feb 20 2022 Different subjects appear in different windows, waves of light pass through each window uniquely and only once per instant of time. Different impressions in light pass through or reflect off the surface of each windows. There are different expressions on people's faces, different gestures or reactions to the fact that they are being photographed, if they are in fact aware that they are being photographed, and different aspects of their awareness. Some subjects appear to be consciously turning away from the camera, others appear completely unaware of the camera's presence, others stare back through the graffitied windows, and others still into the black void of the lens. All subjects whether conscious of it or not, whether consenting or not are providing an impression composed in reflected light, of being, in that instant.

In Praise of Reason May 14 2021 A spirited defense of the relevance of reason for an era of popular skepticism over such matters as climate change, vaccines, and evolution. Why does reason matter, if (as many people seem to think) in the end everything comes down to blind faith or gut instinct? Why not just go with what you believe even if it contradicts the evidence? Why bother with rational explanation when name-calling, manipulation, and force are so much more effective in our current cultural and political landscape? Michael Lynch's In Praise of Reason offers a spirited defense of reason and rationality in an era of widespread skepticism—when, for example, people reject scientific evidence about such matters as evolution, climate change, and vaccines when it doesn't jibe with their beliefs and opinions. In recent years, skepticism about the practical value of reason has emerged even within the scientific academy. Many philosophers and psychologists claim that the reasons we give for our most deeply held views are often little more than rationalizations of our prior convictions. In Praise of Reason gives us a counterargument. Although skeptical questions about reason have a deep and interesting history, they can be answered. In particular, appeals to scientific principles of rationality are part of the essential common currency of any civil democratic society. The idea that everything is arbitrary—that reason has no more weight than blind faith—undermines a key principle of a civil society: that we owe our fellow citizens explanations for what we do. Reason matters—not just for the noble ideal of truth, but for the everyday world in which we live.
