**Digital Communication** Aug 29 2019 This book concerns digital communication. Specifically, we treat the transport of bit streams from one geographical location to another over various physical media, such as wire pairs, coaxial cable, optical fiber, and radio waves. Further, we cover the multiplexing, multiple access, and synchronization issues relevant to constructing communication networks that simultaneously transport bit streams from many users. The material in this book is thus directly relevant to the design of a multitude of digital communication systems, including for example local and metropolitan area data networks, voice and video telephony systems, the integrated services digital network (ISDN), computer communication systems, voiceband data modems, and satellite communication systems. We extract the common principles underlying these and other applications and present them in a unified framework. This book is intended for designers and would-be designers of digital communication systems. To limit the scope to manageable proportions we have had to be selective in the topics covered and in the depth of coverage. In the case of advanced information, coding, and detection theory, for example, we have not tried to duplicate the in-depth coverage of many advanced textbooks, but rather have tried to cover those aspects directly relevant to the design of digital communication systems.

**River of the Sea** Jul 21 2021 River of the Sea is the story of a 4 year old boy (Jules) whose mother was killed in an accident at a hunting lodge. He spent the next twenty years searching for his mother's love in the arms of other women. This event was beyond his recollection and the details were kept a secret by his father who attempted to shield him from this tragedy as he grew into a man. The attempt led to frustration in Jules' life when the community in which he was raised gave birth to the rumor that his mother had committed suicide. This rumor led Jules to seek the truth of that tragic day at his father's hunting lodge. Jules was to find no peace with his many consorts until he went off to the Vietnam war and while attempting to escape his enemy, save the life of a French-Chinese woman whose father had been killed in the Battle of Dien Ben Phu when she was a child.

[The Birth of Top 40 Radio](#) Jul 09 2020 "Top 40" was the preeminent American radio format of the 1950s and 1960s. Although several radio station group owners offered their own versions of the format, the AM stations owned by Todd Storz and his father were acknowledged as the principal developers of Top 40 radio, and the prime movers in making it a nationwide ratings and revenue success. The Storz Stations in St. Louis, Omaha, New Orleans, Minneapolis-St. Paul, Kansas City, Oklahoma City and Miami are profiled in this book, as are various Storz air personalities and executives. A detailed chapter examines the unique "Storz Station sound," revealing the complexity of what detractors portrayed as a simplistic format. Another covers Storz advertising in radio trade magazines, which cemented the company's image as the format's most successful station group and Top 40 as the dominant programming of the day. There are extensive quotations from the memoirs of several of the founders of the format.

*A Still, Small Voice* Sep 22 2021 In *A Still, Small Voice*, famed psychic Echo Bodine turns to a subject she knows deeply and is passionate about: intuition. Using humorous anecdotes and a positive, readable style, this sequel to *Echoes of the Soul* explores what intuition is, where it's located, what it sounds like, and how to cultivate it. The author, who comes from a family of psychics, exposes the various internalized voices that can mask one's intuition. These include the voices of parents, grandparents, peers, therapists, significant others, religious figures, and society, along with emotions such as anger, fear, guilt, and despair. The book challenges the cliché that psychic abilities and intuition are the same, or that they are evil. One chapter is devoted to the many practical benefits that come from listening to intuition; another looks at the "faith-building times" in life and how to cope with others' negative reactions to setting off on the spiritual path.
