[Building Local Bond Markets](#) [Jul 21 2021](#) Since the Asia and Tequila crises of the late 1990s, a growing number of emerging market countries have focused on developing local bond markets to lock in local currency, fixed-rate and long-term funding, and help governments and corporations better manage their financing risks. This book is part of the International Finance Corporation's efforts to assist countries in South Asia and other parts of the world to identify their need for local bond markets, the impediments to developing them, and how those impediments might be removed. The book is based on papers presented at the South Asian Debt Market Symposium held in Sri Lanka in October 1999. It provides valuable insights to emerging market nations wrestling with the issue of building local bond markets. This book will be of interest to bond market specialists, policymakers, and the private sector.

[The Political Economy of Water Pricing Reforms](#) [Jan 03 2020](#) Lately our world has witnessed massive changes and reforms in various sectors in many countries, developing and developed alike. Institutional and pricing reforms in the water sector are also part of that recent trend. They are led by the recognition of a need to respond to increased scarcity and deteriorated quality. Is the water sector different than other sectors, as some claim? Should reforms in the water sector be designed and implemented differently than reforms of a similar type, in other sectors? The Political Economy of Water Pricing Reforms answers these questions by providing various analytical frameworks that allow comparison across various conditions, and by actually comparing reform processes under various conditions in different countries. This book demonstrates the common threads that characterize pricing reforms in the water sector by analyzing various aspects of the reforms in the irrigation and urban subsectors of 10 countries. Cases from Morocco, Senegal, Honduras, Belgium, Australia, Brazil, Mexico, Pakistan, Yemen, and the United States illustrate the difficulties of designing and implementing "optimal" pricing reforms and explain how reform outcomes fall short of the original objective. "This book should be on the must reading list for anyone interested in water pricing and how to reform water rights systems to achieve increased economic efficiency as well as a legitimate and equitable system of property rights." Elinor Ostrom, Co-Director, Workshop in Political Theory and Policy Analysis and Co-Director, Center for the Study of Institutions, Population, and Environmental Change, Indiana University

The Flavour Principle Jun 07 2020 Every great dish has a center of gravity, a flavor or essence that pulls together other ingredients into a coherent and compelling whole. It's not necessarily the main ingredient but it is fundamentally what the dish is "about". Indian curry spices, fiery Thai chilis, lemony citrus, smoky barbecue rubs: these are all flavors we adore and get our taste buds asking for more. When we talk about wine or alcoholic drinks in any serious way, we talk about flavor too. Flavor is, quite simply, what makes us passionate about food and drink. At last, here is a cookbook that focuses on that fundamental concept. Organized around a dozen or more distinctive tastes, from spicy to citrus to salty to smoky to sweet to bitter and beyond, The Flavor Principle will feature more than 30 complete menus with complementary beverage pairings. Covering flavors from all over the world, this cookbook will be a journey around the globe. Modern and eclectic in approach, The Flavour Principle will appeal to a wide demographic of food and wine lovers. The publication of A Matter of Taste in 2005 set the tone for HarperCollins Canada's cookbook program: The Flavour Principle is meant not just as an update of that venerable publication, but will set a new bar for food and beverage pairing cookbooks.
