[Rebirth in the Life and Works of Beatrix Potter](#) Jun 02 2020 This work traces the concepts of initiation and rebirth though Beatrix Potter's personal writing and her children's fiction. Drawing from Potter's letters and journals, it analyses her attempts to escape from what she called her "unloved birthplace" and her overbearing parents to find a happy mature life. Potter felt that her life culminated in her forties, when she was, in effect, reborn through marriage as Mrs. William Heelis, a farmer raising

Herdwick sheep and buying land for the National Trust. The language of transformation and rebirth used throughout her personal writing is echoed in Potter's fiction. From her first book, *The Tale of Peter Rabbit*, through some of the last, such as *The Fairy Caravan* and *The Tale of Little Pig Robinson*, central characters undergo processes of initiation during which they mature toward adulthood. The most successful ones move from being helpless children to being more mature creatures on their way to independence, while others experience no change or even a regressive change.

The Art of Contemporary American Pottery Aug 29 2022 Beauty will always reside in the eye of the beholder, but what about the fine line between beauty and functionality? Can a purely utilitarian form, such as a simple pot, vase, or plate, truly be considered a great work of art? In *The Art of Contemporary American Pottery*, author Kevin A Hluch takes up the challenge of addressing this debate. Hluch, who examines pottery from a unique perspective as historian, scholar and connoisseur, finds as much meaning and nobility in a thoughtfully crafted clay vessel as he does in a masterpiece painting. There are many reasons why a good pot is a good pot. Some reasons are obvious. Some are subtle. Some only reveal themselves when you know how to look. With the help of more than 200 beautiful color photos featuring the world of the country's best utilitarian potters, and a lengthy list of artists and galleries, Hluch does more than just talk about how great pottery is made. He talks about what makes great pottery.

Lucy M. Lewis, American Indian Potter Jul 16 2021 The Acoma pueblo is the oldest continuously inhabited settlement in North America. This Indian community, which probably dates back over a millennium, was home to one of America's most talented and innovative potters-Lucy M. Lewis (d. 1992). Born around the turn of the century, Lewis rose from humble origins to become one of the most important craftspersons of this century. As mother, matriarch, and artist, she made a monumental statement about her own society. She absorbed the work of her Indian ancestors, and from their ancient designs fashioned a modern sensibility that brought Indian pottery into the twentieth century. She began making pots at an early age, teaching herself from shards she found around her home. With age, practice, and a keen eye came perfection, and eventually admirers. Her pieces are now in the collections of prominent museums in New York, Washington, D.C., and Los Angeles, as well as throughout the Southwest. Susan Peterson's intimate biography is a major accomplishment. It captures the essence of this inspirational woman with candor and affection. Over 220 color plates (and 120 black-and-white photos) convey the life and work of Lucy and her family. *Lucy M. Lewis: American Indian Potter* not only offers insights into the sources and milieu of Lewis' vast talent, but documents the achievements of one of America's greatest native craftswomen.

American Art Pottery Jul 28 2022 p.p1 {margin: 0.0px 0.0px 0.0px 0.0px; font: 14.0px Verdana} At the height of the Arts and Crafts era in Europe and the United States, American ceramics were transformed from industrially produced ornamental works to handcrafted art pottery. Celebrated ceramists such as George E. Ohr, Hugh C. Robertson, and M. Louise McLaughlin, and prize-winning potteries, including Grueby and Rookwood, harnessed the potential of the medium to create an astonishing range of dynamic forms and experimental glazes. Spanning the period from the 1870s to the 1950s, this volume chronicles the history of American art pottery through more than three hundred works in the outstanding collection of Robert A. Ellison Jr. In a series of fascinating chapters, the authors place these works in the context of turn-of-the-century commerce, design, and social history. Driven to innovate and at times fiercely competitive, some ceramists strove to discover and patent new styles and aesthetics, while others pursued more utopian aims, establishing artist communities that promoted education and handwork as therapy. Written by a team of esteemed scholars and copiously illustrated with sumptuous images, this book imparts a full understanding of American art pottery while celebrating the legacy of a visionary collector.

This book - written in conjunction with one of the most important exhibitions of American Indian pottery ever mounted - provides an in-depth look at a unique North American art form.

Where is All My Relation? Jul 04 2020 This book explores the poetry, pottery, and culture of David Drake, an antebellum slave who distinguished himself by composing verse on the ceramics he produced in the years leading up to the Civil War. From the 1830s to 1850s, he incised couplets and signatures (a singular "Dave") onto the incredibly large storage vessels that he made. In fact, his stoneware pots and jars are among the largest made in North America during the antebellum era. Rich with biblical allusions, historical facts, and personal opinions, his art provides insights into the lives of slaves, craftsmen, and the culture of the American South in the first half of the nineteenth century. The essays here engage with the historical context and major issues that Drake's work provokes, among them: prohibitions against slave literacy; Drake's privileged status compared to other slaves at the time; the interpretive status of his material craft objects; the influence of contemporary African American poet George Moses Horton; and Drake's ability to sell his pottery despite the fact that slaves were not officially permitted to participate in a cash economy.

The work of Janet Leach - one of the key potters of the twentieth century - brings together a diverse range of influences ranging from early American pottery, traditional Japanese and Korean pots and studio ceramics. Born in the United States she married Bernard Leach in 1956 and lived and worked in St Ives until her death in 1997. Emmanuel Cooper traces the development of her ideas from the early, more formal pots to the later, freely thrown bottles, many of which bear the marks and scarring of the wood fire. With some 200 images, the book confirms Janet Leach's status as a gifted and original potter.

Ceramic Art from Byzantine Serres Jan 10 2021 The art of Byzantine pottery, its manufacture, and its analysis using modern scientific techniques are key elements of Ceramic Art from Byzantine Serres, a companion volume to the first North American exhibition of Byzantine pottery, held at Krannert Art Museum of the University of Illinois at Urbana-Champaign. In the volume's first essay, Eunice Dauterman Maguire and Henry Maguire discuss the aesthetics and design of Byzantine pottery, as well as its relationship to the ceramic traditions of the Near East and Western Europe, particularly Italy. In her chapter on the technology of Byzantine pottery production, Demetra Papanikola-Bakirtzis tells of recent discoveries at Serres, in northern Greece, where a thirteenth- and fourteenth-century kiln site was excavated, along with clay separator rods and wasters. Papanikola-Bakirtzis shows how the items found at Serres allow for detailed reconstruction of the processes used by Late Byzantine potters.

Charalambos Bakirtzis provides an overview of the cultural setting in which Serres pottery was made. Following the catalogue of objects in the exhibition, Sarah Wisseman's portion of the text describes how materials analysis by the Program on Ancient Technologies and Archaeological Materials at the University of Illinois at Urbana-Champaign was used to determine clay sources and glaze composition. Thirty-one illustrations, four of them in color, augment the four essays. In addition, each of the twenty-five catalogue entries gives a full description of a ceramic piece from the Serres workshops and is accompanied by a profile drawing and a photograph. Concluding all are an informative glossary and selected bibliography on Byzantine pottery.

What Makes a Potter Jan 22 2022 Why are people still handmaking utilitarian pottery in the 21st century? Doesn't industrial production take care of all our storage and cooking and serving needs? Yet, in all corners of the US, pottery is being discovered, studied, developed, produced, sold, collected, used, displayed, preserved, and passed down. Answers to these questions are vividly realized in the words of potters themselves--funny, philosophical, intense, and inspiring life narratives captured by Janet Koplos, an award-winning art critic who has followed American studio ceramics for the last four decades. The depth and breadth of this book is unprecedented in American craft history. Fifty individuals or pairs of potters offer their experiences, their thoughts, and their lessons learned. When art is at home in the kitchen, dining room, or living room, as is the case with functional pottery, the impact on our lives can be profound.
