Popular Science Oct 04 2022 Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Mathematical Modelling of Dynamic Biological Systems Apr 13 2021 This volume introduces readers to the methodology of dynamic systems analysis, using mathematical modelling techniques as an aid to understanding biological phenomena. It creates an ability to appreciate current medical and biological literature, in which mathematical models are being used with increasing frequency, and provides an introduction to the more advanced techniques of systems science. Mathematical concepts are presented in reference to frequent biological examples. By the use of case studies drawn from physiology, the various levels of mathematical modelling which can be adopted are discussed.

Proceedings of the 8th International Symposium on Heating, Ventilation and Air Conditioning Feb 13 2021 Proceedings of the 8th International Symposium on Heating, Ventilation and Air Conditioning is based on the 8th International Symposium of the same name (ISHVAC2013), which took place in Xi'an on October 19-21, 2013.

The conference series was initiated at Tsinghua University in 1991 and has since become the premier international HVAC conference initiated in China, playing a significant role in the development of HVAC and indoor environmental research and industry around the world. This international conference provided an exclusive opportunity for researchers, designers, engineers and managers to share their experience. Considering the recent attention on building energy consumption and indoor environmental quality, ISHVAC2013 provided a global platform for discussing recent research on and developments in different aspects of HVAC systems and components, with a focus on energy consumption, energy efficiency and indoor environments. These categories span a broad range of topics, and the proceedings provide readers with a good overview of recent advances in different aspects of HVAC systems and related research. As such, they offer a unique resource for further research and a valuable information for those interested in the subject. The proceedings are intended for researchers, engineers and graduate students in the fields of Heating, Ventilation and Air Conditioning (HVAC), indoor environments, energy systems, and building information and management. Angui Li works at Xi'an University of Architecture and Technology. Yingxin Zhu works at Tsinghua University and Yuguo Li works at The University of Hong Kong.
