**Damages and Compensation Culture** Aug 02 2022 The focus of the essays in this book is on the relationship between compensation culture, social values and tort damages for personal injuries. A central concern of the public and political perception of personal injuries claims is the high cost of tort claims to society, reflected in insurance premiums, often accompanied by an assumption that tort law and practice is flawed and improperly raising such costs. The aims of this collection are to first clarify the relationship between tort damages for personal injuries and the social values that the law seeks to reflect and to balance, then to critically assess tort reforms, including both proposals for reform and actual implemented reforms, in light of how they advance or hinder those values. Reforms of substantive and procedural law in respect of personal injury damages are analysed, with perspectives from England and Wales, Canada, Australia, Ireland and continental Europe. The essays offer valuable insights to anyone interested in the reform of tort law or the tort process in respect of personal injuries.

**The Criminal Injuries Compensation Scheme 2012** Apr 29 2022 The Criminal Injuries Compensation Scheme is a government funded scheme to compensate blameless victims of violent crime. Money (an award) is paid to people who have been physically or mentally injured because they were the blameless victim of a violent crime. This current Scheme introduced on 27 November 2012 applies to any application made on or after that date (for any applications made before then different rules may apply). The Scheme is for people injured in England, Scotland and Wales (Great Britain) and the rules of the Scheme and the value of the payments awarded are set by Parliament. Payments are calculated by reference to a tariff of injuries. Claims are considered for the following: personal injury following a single incident; personal injury following a period of abuse; loss of earnings; special expenses payments - to cover specific injury-related requirements which are not available free of charge from any other source; fatal injuries, including loss of parental services and financial dependency; and funeral payments.

**Taking Property and Just Compensation** Dec 14 2020 While much has been gained from the traditional legal scholars' doctrinal mode of analysis of the takings issue, this volume is presented in the belief that contributions from scholars from the various schools of thought that comprise Law and Economics can complement the traditional doctrinal approach to law. As the discipline of Law and Economics continues to advance, it remains heterodox; there are several vantage points from which to describe and analyze the interrelationships between law and economics. It is hoped that the analyses from the several vantage points provided here will complement the prodigious body of existing doctrinal, legal analysis of the takings issue and deepen the understanding of the jurisprudential questions and economic issues surrounding the takings issue. To this end, each contributor to this volume was selected as 'representative' of one of the schools of thought comprising Law and Economics. In addition, each contributor was provided with a collection of recent United States Supreme Court cases (those summarized in Chapter 1 of this book) along with President Reagan's Executive Order: The sole charge to each contributor was to conduct a legal-economic analysis of the cases and the President's Executive Order from the vantage point of their respective school of thought.

*Compensation for Environmental Damage Under International Law* Feb 02 2020 Inspired by recent litigation, this book identifies and critically appraises the manifold and varied approaches to calculating compensation for damage caused to the environment. It examines a wide range of practice on compensation - in general and specifically for environmental damage - from that of international courts and tribunals, as well as international commissions and regimes, to municipal approaches and other disciplines such as economics and philosophy. Compensation for Environmental Damage Under International Law synthesises these approaches with a view to identifying their blind spots, bringing clarity to an area where there exists broad discrepancy, and charting best practices that appropriately balance the manifold interests at stake. In particular, it is argued that best practice methodologies should ensure compensation serves to fully repair the environment, reflect the emerging ecosystems approach and any implications environmental damage may have for climate change, as well as take into account relevant equitable considerations. This book is essential reading for academics, practitioners and students working in the field of environmental law.

**Atiyah's Accidents, Compensation and the Law** Nov 05 2022 Since its first publication, Accidents, Compensation and the Law has been recognised as the leading treatment of the law of personal injuries compensation and the social, political and economic issues surrounding it. The seventh edition of this classic work explores recent momentous changes in personal injury law and practice and puts them into broad perspective. Most significantly, it examines developments affecting the financing and conduct of personal injury claiming: the abolition of legal aid for most personal injury claims; the increasing use of conditional fee agreements and after-the-event insurance; the meteoric rise and impending regulation of the claims management industry. Complaints that Britain is a 'compensation culture' suffering an 'insurance crisis' are investigated. New statistics on tort claims are discussed, providing fresh insights into the evolution of the tort system which, despite recent reforms, remains deeply flawed and ripe for radical reform.

Doing Away with Personal Injury Law Dec 26 2021 Sugarman offers both a penetrating critique of current personal injury law and a pioneering proposal for new compensation arrangements and new mechanisms for controlling unreasonably dangerous conduct. He argues persuasively that personal injury law as it is currently constructed generates more perverse behavior than desired safety, that it is an intolerably expensive and unfair system of compensating victims, and that in practice it fails to serve any commonsense notion of justice. His solution is the abolition of personal injury law and the institution of reforms based on social insurance and employee benefits.

**Prevention and Compensation of Marine Pollution Damage** Apr 17 2021 Marine oil pollution is one of the most damaging environmental liabilities of our time, and is taken very seriously by governments. Although international conventions take the lead in the legal regime underpinning prevention and compensation of marine oil pollution damage, national legal systems differ considerably in how they interpret and apply their monitoring and enforcement responsibilities. This is the first book to present a comparative analysis of the law with respect to marine oil pollution, with expert contributions emphasising particular solutions in Europe, the US, and China. The authors draw on the full range of legal sources, from theory and legislation to procedure and actual case studies. Written by both academics and practitioners?senior academics with a wide experience in the field, and practitioners who have extensively dealt with marine pollution issues?the work is not confined to a mere legal analysis, but offers a more inclusive law and economics perspective, solidly built on a substantial analysis (in English) of the law in the European, US, Chinese, and international contexts. Individual contributors focus on countries with which they have particular expertise or experience. This book will be of interest to corporate counsel, international lawyers, academics, and policy makers, as well as to students of (international) environmental and maritime law. In addition, the book is especially valuable to non-Chinese lawyers for its clear insight into the complex Chinese environmental legal system.

Compensation for Personal Injury in English, German and Italian Law Aug 10 2020 Cross-border claims for personal injuries are becoming more common. Furthermore, European nationals increasingly join class actions in the USA. These tendencies have created a need to know more about the law of damages in Europe and America. Despite the growing importance of this subject, there is a dearth of material available to practitioners to assist them in advising their clients as to the heads of damage recoverable in other countries. This 2005 book aims to fill that gap by looking at the law in England, Germany and Italy. It sets out the raw data in the wider context of tort law, then provides a closer synthesis, largely concerned with methodological issues, and draws some comparative conclusions.

Compensation Schemes for Damages Caused by Healthcare and Alternatives to Court Proceedings Jan 27 2022 The book discusses compensation mechanisms and other non-judicial means that offer alternatives to court proceedings, designed and provided for within national legal regimes. Such schemes are primarily of a civil or administrative character and are mainly intended to supplement criminal liability for medical negligence. As such, the book focuses on medical malpractice and prospective medical harm from a civil law perspective. It examines the contemporary perspective of a patient-physician relationship, which has evolved from a relation of a quasi-patrimonial character into a partnership of quasi-equal parties, dealing with a medical treatment procedure as a scientific endeavor. It also reviews the extra-legal conditions that are taken into account in compensation arrangements, particularly the need to satisfy a psychological urge for conciliation and empathy on the part of medical personnel. Lastly, the book explores the responsibility of public authorities and healthcare providers to guarantee access to healthcare that is of a sufficient quality, based upon standards provided for in international (and European) law.

The Political Economy of Personal Injury Law May 19 2021 This is the second volume in the annual McPherson Lecture Series, inaugurated by the University of Queensland TC Beirne Law School, which hosts a celebrated international scholar or legal expert to deliver a series of three lectures. In the first two of these thought-provoking lectures, Peter Cane examines the political and economic significance of personal injury law. In his final lecture, he explores the possible future role of tort law as a way of dealing with the social problem of personal injury. He questions whether tort law should provide compensation for non-monetary harm resulting from personal injury, while acknowledging that it would continue to feature as one element of a mixed regime for dealing with personal injuries comprising a range of diverse regulatory and compensatory arrangements.

**Workmen's Compensation Insurance** Jun 19 2021 Excerpt from Workmen's Compensation Insurance: With a Summary of the Statutory Law Relating Thereto The object of this volume is to set forth in handy and compendious form suitable for the use of students, the principles and practice of workmen's compensation insurance. NO attempt has been made to give a detailed exposition of the law on the subject, but a summary is given of the principal provisions of the relative statutes for convenience of reference and as an aid to the due understanding of the principles underlying this branch of insurance business. The subject has been treated as it stands at the present time, and without reference to any projected alterations in the law. The course of political events makes it unlikely that the revision Of the Workmen's Compensation Act, 1906, recommended in the Report of the Royal Commission appointed in 1920 to consider the matter, will materialize for some considerable time. **Punishment, Compensation, and Law** Sep 30 2019 Focusing on the enforceability of legal rights, but also addressing the enforceability of moral rights and social conventions, Mark Reiff explains how we use punishment and compensation to make restraints operative in the world. Describing the various means by which restraints may be enforced, he explains how the sufficiency of enforcement can be measured. He also develops a new, unified theory of deterrence, retribution, and compensation that shows how various aspects of enforceability relate to one another.
